<u>Becoming an Embedded Librarian</u> Michelle Reale,2015-09-01 Embedded librarianship is not one size fits all yet many books on the subject treat it in a cold objective manner that doesn t adequately communicate how becoming an embedded librarian actually works in the real world Here Reale shares her own university classroom experiences to offer a step by step primer for those contemplating the practice Demystifying what can sometimes feel intimidating to academic librarians this down to earth resource defines what embedded librarianship is and isn t explains why being in the classroom is so important and how it creates communities of learning shows how to clarify the role of the librarian in a classroom by being a facilitator

of process offers strategies for relationship building setting goals and honing a teaching style and discusses embedded librarianship and branding Readers will feel confident applying the lessons learned from Reale s first hand account to their own experiences both in and out of the classroom **Curriculum-Based Library Instruction** Amy Blevins,Megan Inman,2014-09-26 The rampant nature of technology has caused a shift in information seeking behaviors In addition current trends such as evidence based medicine and information literacy mean that one time instructional sessions cannot provide our patrons with all of the skills they need For this reason many librarians are working to develop curriculum based instruction that is semester long or consisting of many sessions throughout an academic program In addition to teaching librarians are also becoming embedded in the curriculums they support by serving as web based course designers problem based learning facilitators or members of curriculum committees Although it is fairly obvious that library instruction is important and that librarians should be equipped to provide this instruction the majority of ALA accredited programs offer only one course on library instruction the courses are only available as electives and they are often only offered once a year Librarians need to gain their instructional experiences through real life experiences mentors and of course books like this one Many books commonly discuss one shot sessions and provide tips for getting the most out of that type of instruction There are not as many that discuss curriculum based instruction in a section let alone an entire book Curriculum Based Library Instruction From Cultivating Faculty Relationships to Assessment highlights the movement beyond one shot instruction sessions specifically focusing on situations where academic librarians have developed curriculum based sessions and or become involved in curriculum committees This volume describes and provides examples of librarians varied roles in the curriculum of education programs These roles include semester long or multi session instructor web based course designer problem based learning facilitator and member of a curriculum committee In addition to describing the roles that librarians have in supporting curriculum the book describes how to carry out those roles with sections devoted to adult learning theory teaching methods developing learning objectives and working with faculty to develop curriculum Examples of library sessions devoted to information literacy evidence based practice information literacy and biomedical informatics are included This book is not limited to one mode of delivering information and covers examples of face to face distance and blended learning initiatives **Embedded and Empowered** Courtney Mlinar,2019-02-15 Selected as a 2025 Doody s Core Title People tend to consider a librarian to be someone who works in a library However a professional librarian who is empowered with a good understanding of his or her capabilities and library resources can become a strong knowledge partner for organizations beyond the library walls Embedded librarians build collaborative relationships outside of libraries tailoring services to resolve problems and fulfill information needs Librarians who are embedded into organizations make an impact within the essential activities of these groups Successful embedded librarian programs create great relationships between organizations and libraries that develop strong library advocacy support in communities Embedded librarianship is

not limited to academic librarians who regularly guest lecture or are integrated into courses An embedded librarian may work as an essential and transformative partner in any working group of people Most librarians are aware of the benefits of embedded librarianship but need help in getting started Embedded and Empowered A Practical Guide for Librarians offers library professionals from all types of libraries a plan for success in creating successful embedded partnerships by providing easy to follow instructions tips and exercises to Understand trends in embedded librarianship as well as why specific programs are successfulAnalyze the needs of the stakeholder community and librarian professional skill setsDevelop a plan of action to create and design an embedded librarian initiative Learn techniques and specific scenarios that work with different personalities and groupsImplement manage maintain and evaluate the progress of an embedded programEvaluate and recommend technology tools for embedded communities
