**Nonlinear Photonic Crystals** Richart E. Slusher,Benjamin J. Eggleton,2013-06-29 Nonlinear optical studies of periodic dielectric structures have blossomed in the past two decades New fabrication techniques are producing fiber grating and multidimensional photonic crystals in materials where the refractive index can be varied by light pulses and beams Gap solitons that can propagate at any velocity from zero to the speed of light and spatial solitons that prevent the diffractive spread of light in waveguide arrays are two examples of the new phenomena described in this book Microstructured optical fibers allow control of the guided mode dispersion for broadband light generation and new soliton phenomena Many new materials and structures are being developed that will impact new optical devices with applications in optical communications and optical data processing All the above topics are addressed in detail in this book *Optics Letters* ,2007

**Guided Wave Optical Components and Devices** Bishnu P. Pal,2010-07-19 Guided Wave Optical Components and Devices provides a comprehensive lucid and clear introduction to the world of guided wave optical components and devices Bishnu Pal has collaborated with some of the greatest minds in optics to create a truly inclusive treatise on this contemporary topic Written by leaders in the field this book delivers cutting edge research and essential information for professionals researchers and students on emerging topics like microstructured fibers broadband fibers polymer fiber components and waveguides acousto optic interactions in fibers higher order mode fibers nonlinear and parametric process in fibers revolutionary effects of erbium doped and Raman fiber amplifiers in DWDM and CATV networks all fiber network branching component technology platforms like fused fiber couplers fiber gratings and side polished fiber half couplers arrayed waveguides optical MEMS fiber sensing technologies including safety civil structural health monitoring and gyroscope applications Accessible introduction to wide range of topics relating to established and emerging optical components Single source reference for graduate students in optical engineering and newcomer practitioners focused on components Extensive bibliographical information included so readers can get a broad introduction to a variety of optical components and their applications in an optical network *Nonlinearity and Disorder: Theory and Applications* Fatkhulla Abdullaev,Ole Bang,Mads Peter Sørensen,2012-12-06 Proceedings of the NATO Advanced Research Workshop Tashkent Uzbekistan 2 6 October 2001 **European Quantum Electronics Conference** ,2003 *Electrical & Electronics Abstracts* ,1997

Mittal,2008-01-10 Surface contamination is of cardinal importance in a host of technologies and industries ranging from microelectronics to optics to automotive to biomedical Thus the need to understand the causes of surface contamination and their removal is very patent Generally speaking there are two broad categories of surface contaminants film type and

particulates In the world of shrinking dimensions such as the ever decreasing size of microelectronic devices there is an intensified need to understand the behavior of nanoscale particles and to devise ways to remove them to an acceptable level Particles which were functionally innocuous a few years ago are killer defects today with serious implications for yield and reliability of the components This book addresses the sources detection characterization and removal of both kinds of contaminants as well as ways to prevent surfaces from being contaminated A number of techniques to monitor the level of cleanliness are also discussed Special emphasis is placed on the behaviour of nanoscale particles The book is amply referenced and profusely illustrated Excellent reference for a host of technologies and industries ranging from microelectronics to optics to automotive to biomedical A single source document addressing everything from the sources of contamination to their removal and prevention Amply referenced and profusely illustrated **EQEC '96**, 1996 **Bulletin of the Russian Academy of Sciences**, 2007 Dissertation Abstracts International, 1999 **Physics Briefs**, 1993
