

Science Fiction Stories with Good Astronomy & Physics

by Andrew Fraknoi
(Foothill College & ASP)

This is a selective list of some short stories and novels that use more or less accurate science and can be used for teaching or reinforcing astronomy or physics concepts. I include both traditional "science-fiction" and (occasionally) more serious fiction that derives meaning or plot from astronomy or physics ideas. The titles of short stories are given in quotation marks; only short stories that have been published in book form or are available free on the Web are included. While one book source is given for each short story, note that some of the stories can be found in other collections as well. (See the Internet Speculative Fiction Database, cited at the end, for an easy way to find all the places a particular story has been published.) The author welcomes suggestions for additions to this list, especially if your favorite story with good science is left out.

Anti-matter

- Davies, Paul *Fireball*. 1987, Heinemann. Antimatter micrometeorites threaten Earth.
- Niven, Larry "Flatlander" in *Neutron Star*. 1968, Ballantine. Two explorers find a high-speed protostar and a planet made of antimatter, passing through the Galaxy.

Archaeoastronomy

- Harrison, Harry & Stover, Leon *Stonehenge*. 1972, Scribners. A novel by a science fiction writer and an anthropologist.

Asteroids

- Baxter, Stephen "Pilot" in *Vicinum Diagrams*. 1997, Harper Prism. Future space travelers hollow out Chiron and use it as a spaceship to escape invading aliens.
- Clarke, Arthur "Summertime on Icarus" in *The Nine Billion Names of God*. 1967, Signet. An astronaut is stranded on Icarus, the asteroid with the smallest

perihelion distance, just as it is approaching the Sun.

Hoyle, Fred "Element 79" in *Element 79*. 1967, New American Library. An asteroid with significant amount of gold wreaks havoc with the Earth's economy.

- Preuss, Paul "Small Bodies" in Preiss, Byron, ed. *The Planets*. 1985, Bantam. A fundamentalist preacher and a scientist find fossils on an asteroid.

- Bezzi, Tom *Hubble Time*. 1987, Mercury House. A fictional memoir of Hubble's life; gets some of the facts wrong, but an intriguing effort.
- Brecht, Bertold *Galileo*. A 1938 stage play available alone (Grove Press) or in many collections; not historically accurate, but with strong political points to make.
- McDevitt, Jack & Shara, Michael "Lighthouse" in *Cryptic: The Best Short Fiction of Jack McDevitt*. (2009, Subterranean Press) [also on the web at: http://www.webscription.net/chapters/1596061958/1596061958_8.htm] A story about astronomical discovery told within the frame of a thesis defense colloquium; what it would be like if an astronomer discovered the existence of intelligent life out there by means of modifications they made to astronomical objects.

Fiction Science Large Print:

The Time Machine H. G. Wells, 2012-10-31 The Time Traveller for so it will be convenient to speak of him was expounding a recondite matter to us His grey eyes shone and twinkled and his usually pale face was flushed and animated The fire burned brightly and the soft radiance of the incandescent lights in the lilies of silver caught the bubbles that flashed and passed in our glasses Our chairs being his patents embraced and caressed us rather than submitted to be sat upon and there was that luxurious after dinner atmosphere when thought roams gracefully free of the trammels of precision And he put it to us in this way marking the points with a lean forefinger as we sat and lazily admired his earnestness over this new paradox as we thought it and his fecundity

Wells, 2017-03-27 Large Print Reader Classics are printed with easy to read fonts and feature type size which conforms to large print industry standards The Time Machine is a science fiction novel by H G Wells published in 1895 and written as a frame narrative Wells is generally credited with the popularization of the concept of time travel by using a vehicle that allows an operator to travel purposely and selectively forwards or backwards in time The term time machine coined by Wells is now almost universally used to refer to such a vehicle

The War of the Worlds: Large Print (Reader Classics) H. G. Wells, 2017-03-28 Large Print Reader Classics are printed with easy to read fonts and feature type size which conforms to large print industry standards The War of the Worlds is a science fiction novel by English author H G Wells first serialized in 1897 in the UK by Pearson s Magazine and in the US by Cosmopolitan magazine The novel s first appearance in hardcover was in 1898 from publisher William Heinemann of London Written between 1895 and 1897 it is one of the earliest stories that detail a conflict between mankind and an extraterrestrial race The novel is the first person narrative of both an unnamed protagonist in Surrey and of his younger brother in London as southern England is invaded by Martians The novel is one of the most commented on works in the science fiction canon

The Time Machine H G Wells, 2019-08-12 Wells touches gently on time travel as a notion but mostly The Time Machine is about the terminal future he sees for mankind His nameless time traveler ventures to the world that will be 802 701 A D And there he finds mankind divided among the Eloi and the Morlocks The Eloi are a gentle winsome idle race who do not labor the Morlocks in contrast are a barbaric race who use the Eloi for food It s a grim vision and a gripping one

The Time Machine Herbert George Wells, 2020-02-06 The book s protagonist is an amateur inventor or scientist living in London who is never named he is identified simply as The Time Traveller Having demonstrated to friends using a miniature model that time is a fourth dimension and that a suitable apparatus can move back and forth in this fourth dimension he builds a full scale model capable of carrying himself He sets off on a journey into the future Herbert George Wells better known as H G Wells was an English writer best known for such science fiction novels as The Time Machine The War of the Worlds The Invisible Man and The Island of Doctor Moreau He was a prolific writer of both fiction and non fiction and produced works in many different genres including contemporary novels history and social

commentary He was also an outspoken socialist His later works become increasingly political and didactic and only his early science fiction novels are widely read today Wells along with Hugo Gernsback and Jules Verne is sometimes referred to as The Father of Science Fiction

The Fiction of Science - Large Print Rixta Corona Francis,2015-12-25 This is a really unique book Most books about science deal with one topic and they take science seriously But Rixta Francis has realised that most science is not based on facts but on beliefs and fantasies The book is written in an easy reading non scientific style and it explains about 11 different topics why most science is full of holes and why we should never blindly believe scientists The topics are germs evolution animal intelligence climate change medical research astronomy genes drugs and other medicines archaeology the brain and food This book is not so much meant to educate as to make the readers think for themselves Once you have read this book you will never look at science the same way again Also suitable as a gift with a hint Large print edition

Wave Without a Shore C. J. Cherryh,2000 Freedom was an isolated planet off the spaceways track and rarely visited by commercial spacers It wasn't that Freedom was inhospitable as planets go The problem was that outsiders tourists and traders claimed the streets were crowded with mysterious characters in blue robes and with members of an alien species Native born humans however said that was not the case There were no such blue robes and no aliens Such was the viewpoint of both Herrin the artist and Waden the autocrat until a crisis of planetary identity forced a life and death confrontation between the question of reality and the reality of the question

universe *In the Year 2889* Michel Verne,Jules Verne,2019-12-16 Little though they seem to think of it the people of this twenty ninth century live continually in fairyland Surfeited as they are with marvels they are indifferent in presence of each new marvel To them all seems natural Could they but duly appreciate the refinements of civilization in our day could they but compare the present with the past and so better comprehend the advance we have made How much fairer they would find our modern towns with populations amounting sometimes to 10 000 000 souls their streets 300 feet wide their houses 1000 feet in height with a temperature the same in all seasons with their lines of aerial locomotion crossing the sky in every

direction If they would but picture to themselves the state of things that once existed when through muddy streets rumbling boxes on wheels drawn by horses yes by horses were the only means of conveyance Think of the railroads of the olden time and you will be able to appreciate the pneumatic tubes through which to day one travels at the rate of 1000 miles an hour Would not our contemporaries prize the telephone and the telephote more highly if they had not forgotten the telegraph
