Zaloumis, Robert Cross, 1974      Bovids of the World José R. Castelló, 2016-04-12 The most comprehensive guide to the bovids of the world Bovids are a diverse group of ruminant mammals that have hooves and unbranched hollow horns Bovids of the World is the first comprehensive field guide to cover all 279 bovid species including antelopes gazelles cattle buffaloes sheep and goats From the hartebeest of Africa and the takin of Asia to the muskox of North America bovids are among the world's most spectacular animals and this stunningly illustrated and easy to use field guide is an ideal way to learn more about them The guide covers all species and subspecies of bovids described to date It features more than 300 superb full color plates depicting every kind of bovid as well as detailed facing page species accounts that describe key identification features horn morphology distribution subspeciation habitat and conservation status in the wild This book also shows where to observe each species and includes helpful distribution maps Suitable for anyone with an interest in natural history Bovids of the World is a remarkable and attractive reference showcasing the range and beauty of these important mammals The first comprehensive field guide to all 279 bovid species 337 full color plates with more than 1 500 photographs Detailed species accounts describe key identification features distribution subspeciation habitat behavior reproduction and conservation status Fully updated and revised taxonomy with common and scientific names Easy to read distribution maps      *African Antelope Database 1998* Rod East, 1999 Although most antelope species still exist in large numbers in sub Saharan Africa some in hundreds of thousands up to three quarters of the species are in decline Threats to their survival arise from the rapid growth of human and livestock populations with consequent degradation and destruction of natural habitats and excessive offtake by meat hunters In addition some parts of Africa are now almost completely devoid of large wild animals because of uncontrolled slaughter during recent civil wars This report presents the information currently held by the IUCN SSC Antelope Specialist Group on the conservation status of each antelope species and selected subspecies in sub Saharan Africa Key areas have been identified for the conservation of representative antelope communities While external donors make the greatest contributions to the conservation of antelopes greater recognition of wildlife conservation in national and regional development plans is often a critically important requirement      *The Mammal Guide of Southern Africa* Burger Cillie, 2004 With colour photos distribution maps spoor and photos of faeces and an identification key

**Guide to Southern Africa**, 1896      **Antelopes** David P. Mallon, Steven Charles Kingswood, 2001 Antelope herds numbering in the tens of thousands formerly occurred across the steppes and semideserts of Eurasia and India but these have nearly all been reduced to fractions of their earlier size antelope populations are now fragmented across the region and during recent decades several species have disappeared altogether Threats include hunting loss of habitat population fragmentation inadequate protected area coverage poorly developed administrative structures under resourcing of

conservation programmes and lack of enforcement of existing legislation Rising human population growth and economic development constantly increases pressure on land and natural resources There is a consequent need for integrated rural development and community based conservation projects which have the full participation of local people at the planning and execution stages This publication Part 4 of the Global Antelope Survey covers 37 countries in the region and actions to conserve antelope populations are listed in each country report **The Mammals of the Southern African Sub-region J.**

volumes which describes in detail every currently recognized species of African land mammal This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion

of the morphology distribution biology and evolution including reference to fossil and molecular data of Africa's mammals. With more than 1 160 species and 16 18 orders Africa has the greatest diversity and abundance of mammals in the world. The reasons for this and the mechanisms behind their evolution are given special attention in the series. Each volume follows the same format with detailed profiles of every species and higher taxa. The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold. Every species also includes a detailed distribution map. Edited by Jonathan Kingdon, David Happold, Tom Butynski, Mike Hoffmann, Meredith Happold and Jan Kalina and written by more than 350 authors all experts in their fields, *Mammals of Africa* is as comprehensive a compendium of current knowledge as is possible. Extensive references alert readers to more detailed information. Volume VI, edited by Jonathan Kingdon and Michael Hoffmann, comprises a single order currently subdivided into three suborders containing the hippopotamuses, pigs, chevrotains, deer, Giraffe, Okapi, buffalos, spiral horned antelopes, dwarf antelopes, duikers, grysboks, Beira, dik-diks, gazelles, Klipspringer, Oribi, reedbucks, Impala, alcelaphines, horse-like antelopes, sheep and goats. A definitive field guide to the Antelope of Africa, this book conveys their conservation status, threats and risks for survival, distribution, ranges, habitat requirements, habits and how some of the species were introduced to the scientific world. With text complemented by distribution maps, full color photographs and the latest taxonomic classifications, this book also features specific reference to antelope sub-species as the conservation prospects for many species differ from region to region. The Antelope of Africa also shares the story of Africa's antelope and as the antelope family is becoming increasingly threatened as population numbers are on the decline almost everywhere, it aims to raise appreciation for the diversity of antelope species and their plight in a changing Africa.

It thus follows three previous meetings: Chile 1971, California 1977 and South Africa 1980. There has been no formal international body to organize these meetings; merely a continuity of purpose provided by the common interests of the scientists concerned in the English speaking world. Following previous themes on structure, fire and role of nutrients in mediterranean ecosystems, MEDECOS was structured around the theme *Resilience in Mediterranean Ecosystems*. The invited speakers were requested to deal with particular aspects of this subject and offered papers were encouraged to do so as well. This provided a broad framework for discussions which at the same time highlighted many of the major conservation issues.
