## **Exploring Mathematics With Integrated Spreadsheets In Teacher Education:**

*Exploring Mathematics With Integrated Spreadsheets In Teacher Education* Sergei Abramovich, 2015-07-30 The goal of the book is to technologically enhance the preparation of mathematics schoolteachers using an electronic spreadsheet integrated with Maple and Wolfram Alpha digital tools capable of sophisticated symbolic computations The content of the book is a combination of mathematical ideas and concepts associated with pre college problem solving curriculum and their extensions into more advanced mathematical topics The book provides prospective and practicing teachers with a foundation for developing a deep understanding of many concepts fundamental to the teaching of school mathematics It also provides the teachers with a technical expertise in designing spreadsheet based computational environments Consistent with the current worldwide guidelines for technology enhanced teacher preparation the book emphasizes the integration of context mathematics and technology as a method for teaching mathematics Throughout the book a number of mathematics education documents developed around the world Australia Canada England Japan Singapore United States are reviewed as appropriate

**Integrating Computers And Problem Posing In Mathematics Teacher Education** Sergei Abramovich, 2018-09-17 The book is written to share ideas stemming from technology rich K 12 mathematics education courses taught by the author to American and Canadian teacher candidates over the past two decades It includes examples of problems posed by the teacher candidates using computers These examples are analyzed through the lenses of the theory proposed in the book Also the book includes examples of computer enabled formulation as well as reformulation of rather advanced problems associated with the pre digital era problem solving curriculum The goal of the problem reformulation is at least two fold to make curriculum materials compatible with the modern day emphasis on democratizing mathematics education and to find the right balance between positive and negative affordances of technology The book focuses on the use of spreadsheets Wolfram Alpha Maple and The Graphing Calculator also known as NuCalc in problem posing It can be used by pre service and in service teachers interested in K 12 mathematics curriculum development in the digital era as well as by those studying mathematics education from a theoretical perspective

*Topics in Mathematics For Elementary Teachers* Sergei Abramovich, 2024-01-01 This is the second revised edition of the book published in 2010 under the same title It reflects the author's experience teaching a graduate level mathematics content course for elementary teacher candidates at SUNY Potsdam since 2003 The book addresses a number of recommendations of the Conference Board of the Mathematical Sciences for the preparation of teachers demonstrating how abstract mathematical concepts can be motivated by concrete activities and the use of technology Such approach to school mathematics makes it easier for teachers to grasp the meaning of generalization formal proof and the creation of an increasing number of concepts on higher levels of abstraction The book's computer enhanced pedagogy and its strong experiential component enabled by the use of manipulative materials have the potential to reduce mathematics anxiety among teachers and help them develop confidence in teaching the subject matter

through modeling and problem solving Classroom observations of teachers learning mathematics as a combination of theory and experiment confirm that this approach elevates one's mathematical understanding to a higher ground Most of the chapters are motivated by a problem typically found in the elementary mathematics curricula and or standards either National or New York State the context in which the author prepare teachers By exploring traditional problems in depth teachers can uncover fundamental mathematical concepts and ideas hidden within a seemingly mundane task The need to have experience in going beyond traditional expectations for learning is due to the constructivist orientation of contemporary mathematics pedagogy that encourages students to ask questions about mathematics they study Each chapter except the last one includes an activity set that can be used for the development of the variety of assignments for teachers Digital tools used in the book include spreadsheets Wolfram Alpha GeoGebra Kid Pix Studio Deluxe and Graphing Calculator Pacific Tech

**Integrating Computer Technology Into the Classroom** Gary R. Morrison, Deborah L. Lowther, 2005 This book focuses on integrating computers into teaching through the use of an inquiry based easy to use model for creating lesson plans Teachers can use this 10 step process to design student centered learning environments in which computer technology is integrated as a tool for learning rather than as a delivery mechanism In addition this book provides many practical examples and tips throughout to facilitate student understanding of chapter content Rethinking Computers and Instruction iNtegrating Technology for inQuiry The NTeQ Model Teacher as Designer I Teacher's Toolbox Teacher as Designer II Teacher's Lesson Planning Implementation From Plan to Action Teacher as Facilitator Managing the Classroom The Role of Assessment Word Processing Spreadsheets Databases Presentation of Results The Internet in the Classroom Educational Software Computers as a Tool for Teachers **Current Index to Journals in Education**, 1998 *Resources in Education*, 1997
