Exposing Men The Science And Politics Of Male Reproduction:

Exposing Men : The Science and Politics of Male Reproduction Cynthia R. Daniels Associate Professor of Political Science Rutgers University, 2006-08-03 *Exposing Men* examines how ideals of masculinity have long skewed our societal and scientific understanding of one of the pillars of male identity reproductive health Only with the recent public exposure of men s reproductive troubles has the health of the male body been thrown into question and along with it deeper masculine ideals Whereas once men s sexual and reproductive abilities were the most taboo of topics today erectile dysfunction is a multi billion dollar business and magazine articles trumpet male reproductive decline with headlines such as You re Half the Man Your Father Was Cynthia R Daniels casts a gimlet eye on our world of plummeting sperm counts spiking reproductive cancers sperm banks and pharmacological cures for impotence in order to assess the true state of male health What she finds is male reproductive systems damaged by toxins and war and proof piling up that men through sperm pass on harm to the children they father Yet despite the evidence that men s health as much as women s significantly affects the vitality of their offspring Daniels also sees a society holding on to outdated assumptions one in which men ignore blatant health risks as they struggle to live up to antiquated ideas of manliness

Masculinities and Discourses of Men's Health

Gavin Brookes, Małgorzata Chałupnik, 2023-10-30 This book brings together a collection of case studies that explore the relationship between health and masculinity It covers various topics related to health such as mental health sexual health eating disorders and coronavirus and offers health based perspectives on issues such as migration and gender identity as these relate to masculinities In exploring these themes this book addresses a wide range of communicative contexts including online forums interviews advertising sex education materials migrant integration classes and suicide notes This book will appeal to linguists interested in health and gender particularly masculinities as well as scholars in fields such as psychology media studies cultural studies and other humanities and social science disciplines with a focus on discourse

The Handbook of Science and Technology Studies, fourth edition Ulrike Felt, Rayvon Fouche, Clark A. Miller, Laurel Smith-Doerr, 2016-12-16 The fourth edition of an authoritative overview with all new chapters that capture the state of the art in a rapidly growing field Science and Technology Studies STS is a flourishing interdisciplinary field that examines the transformative power of science and technology to arrange and rearrange contemporary societies The Handbook of Science and Technology Studies provides a comprehensive and authoritative overview of the field reviewing current research and major theoretical and methodological approaches in a way that is accessible to both new and established scholars from a range of disciplines This new edition sponsored by the Society for Social Studies of Science is the fourth in a series of volumes that have defined the field of STS It features 36 chapters each written for the fourth edition that capture the state of the art in a rich and rapidly growing field One especially notable development is the increasing integration of feminist gender and postcolonial studies into the body of STS knowledge The book covers methods and participatory practices in STS

research mechanisms by which knowledge people and societies are coproduced the design construction and use of material devices and infrastructures the organization and governance of science and STS and societal challenges including aging agriculture security disasters environmental justice and climate change Seminal Rene Almeling, Lisa Campo-Engelstein, Brian T. Nguyen, 2025-06-24 The complexities and controversies at the nexus of sperm health and politics In *Seminal* experts from across the social sciences humanities law and medicine offer a kaleidoscopic view of the relationship between sperm health and the intersecting politics of gender race and reproduction Always insightful and often provocative the essays in this unprecedented collection cover a broad range of issues related to male reproductive and sexual health including the latest technological developments for creating sperm the specter of eugenics in contemporary medical markets emerging approaches to male contraceptive methods male infertility and trans healthcare controversies surrounding sperm donors and sperm banking disparities in sexual health education for teens all the while attending to the enormous variation in how individuals and societies understand embody and experience sperm At a time when the most basic rights of reproductive autonomy are under severe threat contributors to this volume argue this is precisely the moment to rethink and reimagine sperm from a variety of medical political and cultural perspectives Ultimately this volume aims to contribute to a more reproductively just society and broaden conversations around bodies health and equity in the United States

Biocultural Creatures Samantha Frost, 2016-05-19 In *Biocultural Creatures* Samantha Frost brings feminist and political theory together with findings in the life sciences to recuperate the category of the human for politics Challenging the idea of human exceptionalism as well as other theories of subjectivity that rest on a distinction between biology and culture Frost proposes that humans are biocultural creatures who quite literally are cultured within the material social and symbolic worlds they inhabit Through discussions about carbon the functions of cell membranes the activity of genes and proteins the work of oxygen and the passage of time Frost recasts questions about the nature of matter identity and embodiment In doing so she elucidates the imbrication of the biological and cultural within the corporeal self In remapping the relation of humans to their habitats and arriving at the idea that humans are biocultural creatures Frost provides new theoretical resources for responding to political and environmental crises and for thinking about how to transform the ways we live *Infertile Environments* Janelle Lamoreaux, 2022-11-18 In *Infertile Environments* Janelle Lamoreaux investigates how epigenetic research into the effects of toxic exposure conceptualizes and configures environments Drawing on fieldwork in a Nanjing China toxicology lab that studies the influence of pesticides and other pollutants on male reproductive and developmental health Lamoreaux shows how the lab s everyday research practices bring national hormonal dietary maternal and laboratory environments into being She situates the lab s work within broader Chinese history as well as the contemporary cultural and political moment in which declining fertility rates and reproductive governance and technology are growing concerns She also points to how toxicology in China is a transnational endeavor tied to both local conditions and international research

agendas and infrastructures which highlights the myriad scales and scope of epigenetic environments At a moment of growing concerns about toxins endocrine disrupting chemicals and climate change Lamoreaux demonstrates that epigenetic research s proliferation of environments produces new kinds of toxic relations that impact multiple generations of humans
