

Forces – Acceleration**Question 1**

A student investigated how the acceleration of a trolley is affected by the height of a ramp. The image below shows some of the equipment the student used.

Describe a method the student could use to carry out the investigation.

Forces – Acceleration

Level	Description	Marks awarded
	There is no relevant content in the answer	0
1	The response details a method that will not lead to a valid outcome. A few steps are included but they are not logically sequenced, and no links are made	1-2
2	The response details a method that may not lead to a valid outcome. The method is not logically sequenced but includes most steps	3-4
3	The response details a method that would lead to a valid outcome. All the key steps are included, and they are logically sequenced	5-6

Model Answer 1

Place a wooden block under the ramp and measure the height of the ramp using a ruler. Place two light gates over the ramp at different locations, attach the light gates to a computer. Place the trolley at the start position and release the trolley without applying a force. The light gates measure the speed and distance, then the computer calculates the acceleration. Repeat at the same height, remove anomalies and calculate a mean. Repeat the method at different heights. Ensure the trolley is placed at the same starting position each time.
