Extinct Madagascar Picturing The Islands Past:

Extinct Madagascar Steven M. Goodman, William L. Jungers, 2014-09-04 The forests of Madagascar are legendary for their incredible biodiversity and the mammal fauna in particular is far more diverse and largely endemic than most places on earth A new carnivorous mongoose was discovered recently dubbed Durrell's *Viverra zosterophora salanoia durrelli* after the late British conservationist Gerald Durrell and it is one of just many of this extraordinary group But with each new find so too is Madagascar experiencing alarming extinction rates and the forests have lost in recent time hundreds of charismatic and ecologically and evolutionarily distinct species *Extinct Madagascar* explores the recent past of Madagascar mammals introducing readers to the geologic and ecological history of Madagascar providing the context for mammalian evolution and diversification Originally commissioned color plates depict species and entire communities and reconstruct a recent past in part to remind us all what is at stake in current and future conservation of these incredible faunas *Evolution of Island Mammals* Alexandra van der Geer, George Lyras, John de Vos, 2021-04-27 EVOLUTION OF ISLAND MAMMALS Evolution on islands differs in a number of important ways from evolution on mainland areas Over millions of years of isolation exceptional and sometimes bizarre mammals evolved on islands such as pig sized elephants and hippos giant rats and gorilla sized lemurs that would have been formidable to their mainland ancestors *Evolution of Island Mammals* Second Edition provides an updated and expanded overview of the current knowledge on fossil island mammals worldwide ranging from the Oligocene to the onset of the Holocene The book addresses evolutionary processes and key aspects of insular mammal biology exemplified by a variety of fossil species Readers familiar with the first edition will find here a host of updated and enhanced material including An entirely new chapter on the island rule Updated and expanded theoretical chapters Updated and improved taxonomic information Extensive coverage of new discoveries Body masses or body size indices for most extinct island mammals New figures visualizing the richness of the fossil record This accessible and richly illustrated textbook is written for graduate level students and professional researchers in evolutionary biology palaeontology biogeography zoology and ecology **Madagascar** Daniel Austin, Hilary Bradt, 2017-08-17 A new thoroughly updated 12th edition of Bradt's *Madagascar* the leading and most comprehensive guide to this unique island nation written by Hilary Bradt who first visited in 1976 and has returned roughly 35 times and Daniel Austin who has visited 12 times and continues to travel there annually Bradt's *Madagascar* is by far the most thorough guide to the country in English and is written and updated by established experts whose unparalleled knowledge of Madagascar combines with contributions from over 50 experts in a book which has been the most authoritative guide to the country for three decades It covers national parks and protected areas and includes itineraries to suit all interests and budgets plus details of around 1 000 hotels and restaurants Madagascar is like nowhere else on earth It is fascinating not only zoologically and botanically but culturally linguistically historically and geologically This vast island is the fourth largest in the world and also the oldest This is part of the reason

why it has evolved into an incredible hotspot for biodiversity with a truly unique flora and fauna that is more than 80% endemic to the island and with new species being described virtually on a daily basis Madagascar is also the only place where you can see wild lemurs Almost a quarter of the world's 450 or so primates exist only here With Bradt's Madagascar you can visit tropical rainforest and seek out its incredible flora and fauna explore the otherworldly eroded limestone spires most famously at Tsingy de Bemaraha National Park Madagascar's most striking landscape discover the beach fringed islands around Nosy Be with their fabulous scuba diving snorkelling kayaking whale watching and fishing opportunities and make the most of a host of adventuring and sporting possibilities including surfing windsurfing kitesurfing rock climbing tree climbing caving river trips mountain biking distance running quad biking trekking and hiking Also covered are the UNESCO World Heritage Site of Ambohimanga the renowned Avenue des Baobabs one of the country's most photographed scenes and information on the best birdwatching spots Madagascar has almost 300 avian species with a high proportion of endemics including five whole endemic families
