Marty, 2009 Despite the numerous studies of Frank Lloyd Wright's life and architecture little has been published about his life in relation to the communities that dominated his life Wright a fervent believer in individualism and an ardent advocate of democracy worked in communities throughout his career of more than six decades These communities which he led with unquestioned authority made possible his extraordinary productivity They also helped sustain his genius provided him with crucial social outlets and made it possible for him to remain a creative force outside the mainstream of American architecture until his death at age 91 Almost immediately after arriving in Chicago in 1887 Wright began working in the company of architects and draftsmen most notably Joseph Lyman Silsbee Dankmar Adler and Louis Sullivan In 1893 he opened his own practice in downtown Chicago and formed relationships with communities of young architects and draftsmen there Five years later Wright moved his venture to his home and studio in Oak Park Although his community of coworkers there was highly

productive in 1909 he abandoned them his practice and his family turned his projects over to others and left for Europe with his mistress In the next twenty years he formed incidental communities wherever his work took him including Europe Japan California and Arizona while maintaining his base at Taliesin his home near Spring Green Wisconsin In 1932 after years of hardship Wright and his third wife Olgivanna founded the Taliesin Fellowship a community of apprentices and assistants Five years later the Fellowship began to spend winters at Taliesin West a camp he designed in Scottsdale Arizona When Wright died in 1959 his widow became the Fellowship s unchallenged leader and she remained so until her death 26 years later Marty s groundbreaking work is neither a biography of Wright nor a study of his architecture rather it is the story of his life in communities particularly the Taliesin Fellowship This study will be of interest to Wright scholars and enthusiasts architects architectural historians and architecture students
