First Contact

Stan Schatt

The background of the book cover features a profile of a human head in a blue, ethereal glow against a cosmic backdrop of stars and nebulae. A bright, multi-colored light source, possibly a star or a distant planet, is visible behind the head, creating a lens flare effect. The overall color palette is dominated by blues, purples, and greens, with a dark green vertical band on the left side.

Extraterrestrial First Contact Stan Schatt, 2015-02-24 The latest research on past and current day contacts with extraterrestrials as well as discussion on what impact with an alien race would have on everything from our religious and political institutions to our education science and arts Schatt explains current SETI strategy as well as the real danger SETI is ignoring that could bring about the end of humanity according to warnings by Stephen Hawking and Elon Musk This book examines the various forms aliens could take as well as how differences in their physiology culture language psychology ethics and morality could change our world Schatt draws on the latest works by Search for Extraterrestrial Intelligence SETI researchers as well as leading exobiologists and archeologists to explain the difficulties in crafting messages as well as understanding any messages received The book includes an annotated review of the best materials on the subject

Alien Universe Don Lincoln, 2013-10-15 Are alien civilizations really possible If extraterrestrials exist where are they How likely is it that somewhere in the universe an Earth like planet supports an advanced culture Why do so many people claim to have encountered Aliens In this gripping exploration scientist Don Lincoln exposes and explains the truths about the belief in and the search for life on other planets In the first half of Alien Universe Lincoln looks to Western civilization s collective image of Aliens showing how our perceptions of extraterrestrials have evolved over time The roots of this belief can be traced as far back as our earliest recognition of other planets in the universe the idea of them supporting life was a natural progression of thinking that has fascinated us ever since Our captivation with Aliens has however led to mixed results The world was fooled in the nineteenth century during the Great Moon Hoax of 1835 and many people misunderstood Orson Welles s 1938 radio broadcast The War of the Worlds leading to significant anxiety among some listeners Our continuing interest in Aliens is reflected in entertainment successes such as E T The X Files and Star Trek The second half of the book explores the scientific possibility of whether advanced Alien civilizations do exist For many years researchers have sought to answer Enrico Fermi s great paradox if there are so many planets in the universe and there is a high probability that many of those can support life then why have we not actually encountered any Aliens Lincoln describes how modern science teaches us what is possible and what is not in our search for extraterrestrial civilizations Whether you are drawn to the psychological belief in Aliens the history of our interest in life on other planets or the scientific possibility of Alien existence Alien Universe is sure to hold you spellbound

Commercial Space Exploration Jai Galliot, 2016-03-09 Not since man set foot on the moon over four decades ago has there been such passion and excitement about space exploration This enthusiasm and eagerness has been spurred on by the fact that for the first time since the very beginning of the space age space travel is no longer limited to an elite group of highly trained and well disciplined military officers and test pilots Instead we must understand that the possibility of commercial space travel is already on our horizon and that it comes with a number of significant practical and moral challenges Our level of scientific development and ability to influence international affairs and policy confers upon us

an obligation to study the ethical legal and social considerations associated with space exploration and understanding the potential consequences from the beginning is critical This volume provides the first comprehensive and unifying analysis concerning the rise of private space exploration with a view toward developing policy that may influence real world decision making The plethora of questions demanding serious attention privatisation and commercialisation the impact on the environment health futures risk assessment responsibility and governance are directly addressed in this scholarly work
