Olympic events from the stands are less subjected to the language of the commentators journalists and even the athlete interviews as they form impressions and understandings of the games However even those who sit in the stands for the opening ceremonies or walk down the streets of the Olympic Village and the host city are treated to media spectacles that are intentionally produced to display the attitudes values and beliefs of the host country and its Olympic Committee This book performs the important task of analysing ways in which the media serves as both an integral component and an arbiter of the Games for society This book was originally published as a special issue of Mass Communication and Society

Gender, Culture, and Physicality Helen M. Sterk, Annelies Knoppers, 2009-12-30 Although a plethora of scholarship analyzes gender dynamics this book seeks to explore the paradoxes and taboos associated with gendered meanings given to human bodies in action or physicality Physicality provides a particularly clear playing space for developing concepts of gender identity structures and cultural meanings When people think about gender differences they often refer to those associated with physicality such as giving birth or playing contact sports Helen M Sterk and Annelies Knoppers attend to the meanings and values given to human bodies in motion that reflect cultural respect or disrespect for what is seen as womanly in particular times and places In doing so they show how these meanings can reinforce or challenge common ways of doing gender that at first glance may not seem to be related to physicality Grappling with gender based paradoxes and questioning gendered taboos two goals animate the book to reveal how gender continues to be enacted in ways that dehumanize women and men and to stimulate thinking and action toward a fuller realization of human potential and partnership Operating from an ethic of care in which all people are understood as being created equal Sterk and Knoppers argue that as long as women and all that is associated with them are devalued cultural practices will remain implicitly gendered and humanity itself reduced
