Exquisite Corpse Writings On Buildings:

Exquisite Corpse Michael Sorkin, 1991 *Exquisite Corpse* was a game played by the surrealists in which someone drew on a piece of paper folded it and passed it to the next person to draw on until finally the sheet was opened to reveal a calculated yet random composition In this entertaining and provocative book Michael Sorkin suggests that cities are similarly assembled by many players acting with varying autonomy in a complicit framework An unfolding terrain of invention the city is also a means of accommodating disparity of contextualizing sometimes startling juxtapositions Sorkin's aim is to widen the debate about the creation of buildings beyond the immediate issues of technology and design He discusses the politics and culture of architecture with daring often devastating observations about the institutions and personalities who have dominated the profession over the past decade Their preoccupation with the empty style of beach houses and Disneyland has consistently trivialized the full constructive scope of contemporary architecture's possibilities Sorkin's interventions range from the development scandals of New York where skyscrapers stand at the intersection between grid and greed through the deconstructivist architectural culture of Los Angeles to the work and ideas of architects developers and critics such as Alvar Aalto Norman Foster Paul Goldberger Michael Graves Coop Himmelblau Philip Johnson Leon Krier Frank Lloyd Wright Richard Rogers Carlo Scarpa James Stirling Donald Trump Tom Wolfe and Lebbeus Woods Throughout Sorkin combines stinging polemic with a powerful call for a rebirth of architecture that is visionary and experimental a recuperated dreamy science

The Idea of Building Steven Groak, 2002-09-11 This book is unique in its attempt to explore the many ways we have of thinking about buildings In particular it raises questions about the kinds of knowledge we have and will need in designing making and enjoying our buildings At the very least this book provides an overview of the fragmented construction industry making it a vital purchase for all construction related students However the author has written for a wider audience making the book an essential guide for those interested in the form of buildings or the deliberate ways in which people build them

Building Faith Robert E. Brenneman, Brian Jonathan Miller, 2020 The social sciences have largely ignored the role of physical buildings in shaping the social fabric of communities and groups Although the emerging field of the sociology of architecture has started to pay attention to physical structures Brenneman and Miller are the first to combine the light of sociological theory and the empirical method in order to understand the impact of physical structures on the religious groups that build transform and maintain them *Building Faith* explores the social impact of religious buildings in places as diverse as a Chicago suburb and a Guatemalan indigenous Mayan village all the while asking the questions How does space shape community and How do communities shape the spaces that speak for them

Reflections on Architecture, Society and Politics Graham Cairns, 2016-10-04 *Reflections on Architecture Society and Politics* brings together a series of thirteen interview articles by Graham Cairns in collaboration with some of the most prominent polemic thinkers and critical practitioners from the fields of architecture and the social sciences including Noam Chomsky Peggy Deamer Robert A M

Stern Daniel Libeskind and Kenneth Frampton Each chapter explores the relationship between architecture and socio political issues through discussion of architectural theories and projects citing specific issues and themes that have led to and will shape the various aspects of the current and future built environment Ranging from Chomsky s examination of the US Mexico border as the architecture of oppression to Robert A M Stern s defence of projects for the Disney corporation and George W Bush this book places politics at the center of issues within contemporary architecture **Building Institution** Kim Förster,2024-02-21 Building Institution chronicles the expansion of architecture as a profession and discipline in the postmodern era Kim F rster traces the compelling history of the Institute for Architecture and Urban Studies which was active in New York from 1967 to 1985 Drawing on extensive archival research and oral histories he constructs a collective biography that details the Institute s diverse roles and the dynamic interplay between research and design education culture and publishing By exploring the transformation of cultural production into a practice as well as the culturalization and global postmodernization of architecture the volume contributes significantly to the institutional history of architecture

Architectural Periodicals Avery Library, 1997 **The Chicago Gangster Theory of Life** Andrew Ross, 1994 Strange and scary days for an ecology movement that was conceived in fierce opposition to power Fractured as ever by divisions and competing agendas the movement must now confront the dangerous tendency of those in power to invoke nature's laws as a model for social well being Partly as a result of ecology's influence biologism is back and the spectres of social Darwinism and Malthusian ideas about natural scarcity have begun to reinforce if not translate in calls for a reduction in right and freedoms in our civil society Andrew Ross's *The Chicago Gangster Theory of Life* questions the evangelical asceticism of much environmentalist thought and calls for a renewal of the libertarian post scarcity tradition Opening with a stunning essay on the ethnic and socio economic bases of cultural nationalism in the Pacific Islands he assesses the continuing historical appeal of ecological romanticism long associated with Polynesian peoples and central today to a tourist industry that is the new mode of Third World underdevelopment Turning to home he analyzes the 1933 bombing of New York's World Trade Center in the ecological context of urban development that has made the city a capital both of global finance and of new immigrant cultures In a response to the bombing and environmental terrorism of the Gulf War Ross goes on to explore the ecology of images that characterized the media's role in that war's carnage and in the mounting collateral damage of the New World Order A fourth chapter discusses the much hyped men's movement as a response to debates among eco feminists The book concludes with a sweeping critique of the new world view being ushered in by geneticists and the biotechnology industry a philosophy of biological determinism that Ross describes as the Chicago gangster theory of life With his sharp eye for the crucial cultural phenomena of our times Ross's wary take on the contradictions of green politics is tempered by his commitment to dispel the ecology movement's public image as an anti libertarian politics that always says no and preaches self limitation rather than promising social fulfillment He sees an ecological future of public affluence and not voluntary poverty a world where nature is a participant in our social plans and not an authority locking us into some incontrovertible fate *The Architects' Journal*, 1994 **Bauhaus Conflicts, 1919-2009** Philipp Oswalt, Martin-Gropius-Bau (Berlin, Germany), Museum of Modern Art (New York, N.Y.), 2009 The Bauhaus one of the icons of modernism was controversial from the start not only because of internal strife but also due to critique or enmities from the outside And the controversy did not end with the closure of the Bauhaus itself Yet nothing else revealed Bauhaus ideas and ideology as well as these confrontations did Through them the basic issues of the modernist program became clear It became obvious that there was no such thing as one kind of modernism just as there was no ONE Bauhaus instead there were different contradictory and even oppositional movements and positions the Bauhauses Few cultural movements have been as politically instrumentalized as the Bauhaus has These controversies reflect the relationship between politics and culture in the twentieth century and hence the history of the construction of German identity
