numerous other terrorist attacks The Hofstadgroup offers a window into the broader phenomenon of homegrown jihadism that arose in Europe in 2004 and is still with us today Utilizing interviews with former Hofstadgroup participants and the extensive police files on the group *Becoming a European Homegrown Jihadist* overcomes the scarcity of high quality data that has hampered the study of terrorism for decades The book advances a multicausal and multilevel understanding of involvement in European homegrown jihadism that is critical of the currently prevalent radicalization based explanatory frameworks It stresses that the factors that initiate involvement are separate from those that sustain it which in turn are again likely to differ from those that bring some individuals to actual acts of terrorism This is a key resource for scholars of terrorism and all those interested in understanding the pathways that can lead to involvement in European homegrown jihadism

*Engaging with Violent Islamic Extremism* Floris Vermeulen, Frank Bovenkerk, 2012 The terrorist attacks at the start of the new millennium shook the world In Western countries the new threat of home grown Islamic terrorism has directed the authorities attention towards local Muslim communities Islamic terrorism is generally seen as a sign of the lack of integration of these communities Authorities therefore often opt for preventive policies in which the engagement with

Muslim organizations and spokespersons plays a significant role However this engagement comes with its own problems and dilemmas Should authorities aim for a broad representation of the community or instead go for selective engagement Are non violent fundamentalist organizations also to be seen as the enemy Should authorities enter into public debate with extremist organizations Is it wise to link anti radicalization policies to more general integration policies Engaging with Violent Islamic Extremism shows how authorities in London Berlin Amsterdam Paris and Antwerp have each developed distinctive policies and how they have dealt with the accompanying dilemmas The book distills various approaches that can be assessed by their merits and defects thus stimulating important reflection on the what why and how of anti radicalization policy This is a well done scholarly collection of case studies It is devoid of the usual political correctness and goes right to the heart of the matter a useful guide to the political and social leadership of other cities in Europe and the Americas who face similar challenges and one that is refreshingly distinct in its frankness Richard R E Kania International Criminal Justice Review Vol 23 403 404      *Extreme Right Wing Political Violence and Terrorism* Max Taylor,P.M. Currie,Donald Holbrook,2013-02-14 In this collection senior experts explore all aspects of extreme right wing political violence from the nature of the threat processes of engagement and ideology to the lessons that can be drawn from exiting such engagement Further right wing activism and political violence are compared with Jihadi violence and engagement Also the European experience is placed within a greater framework including that of the United States and the Arab Spring The book opens with an essay on U S far right groups investigating their origins and processes of recruitment It then delves into violence against UK Mosques and Islamic centers the relationship between Ulster loyalism and far right extremism the Dutch extremist landscape and the July 2011 Norway attacks Also discussed are how narratives of violence are built and justified at what point do individuals join into violence and how differently states respond to left wing vs right wing extremism This comparative work offers a unique look into the very nature of right wing extremism and will be a must read for anyone studying political violence and terrorism
