# Erdas Imagine 2013 User Guide

**Eva H. Dodsworth**

## **Erdas Imagine 2013 User Guide:**

*A Research Guide to Cartographic Resources* Eva H. Dodsworth, 2018-09-22 The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields. A Research Guide to Cartographic Resources navigates the numerous American and Canadian cartographic resources available in print and online offering researchers, academics, and students with information on how to locate and access the large variety of resources, new and old. Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations. A Research Guide to Cartographic Resources consists of 18 chapters, two appendices, and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides, including cartographic categories such as atlases, dictionaries, gazetteers, handbooks, maps, plans, GIS data, and other related material. Almost all of the resources listed in this guide are categorized by geography down to the county level, making efficient work of the type of material required to meet the information needs of those interested in researching place-specific cartographic-related resources. Additionally, this guide will help those interested in not only developing a comprehensive collection in these subject areas but also get an understanding of what materials are being collected and housed in specific map libraries, geospatial centers, and their related websites. Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level. This volume combines the traditional and historical collections of cartography with the modern applications of GIS-based maps and geospatial datasets. **Encyclopedia of Information Science and Technology, Third Edition**

Khosrow-Pour, D.B.A., Mehdi, 2014-07-31 This 10-volume compilation of authoritative research-based articles contributed by thousands of researchers and experts from all over the world emphasized modern issues and the presentation of potential opportunities, prospective solutions, and future directions in the field of information science and technology. Provided by publisher. Landscape Dynamics, Soils and Hydrological Processes in Varied Climates Assefa M. Melesse, Wossenu Abtew, 2015-07-21 The book presents the processes governing the dynamics of landscapes, soils, and sediments, water, and energy under different climatic regions using studies conducted in varied climatic zones, including arid, semi-arid, humid, and wet regions. The spatiotemporal availability of the processes and fluxes and their linkage to the environment, land, soil, and water management are presented at various scales. Spatial scales including laboratory, field, watershed, river basin, and regions are represented. The effect of tillage operations and land management on soil physical characteristics and soil moisture is discussed. The book has 35 chapters in seven sections: 1. Landscape and Land Cover Dynamics; 2. Rainfall Runoff Processes; 3. Floods and Hydrological Processes; 4. Groundwater Flow and Aquifer Management; 5. Sediment Dynamics and Soil Management; 6. Climate change impact on vegetation, sediment, and water dynamics; and 7. Water and Watershed Management.

**Dynamic Response of Coasts and Estuaries to Human Impacts** Xiao Hua Wang, 2024-07-25 The coasts cover a

diverse range of ecosystems within marine estuarine and freshwater environments They are some of the most heavily populated and visited areas and are also some of the most threatened natural habitats Coastal zones are critically important not only to the people who live there but for the health of the planet Many world estuaries and coast environments are under tremendous stress in response to global warming and the increased anthropogenic forcing Warmer waters rising sea levels tropical cyclones storm surges and flooding and coastal erosion are just some of the elements impacting coastal communities worldwide and transforming these environments Coastal hazards such as storm events with associated storm surges are increasing in frequency and intensity as are marine heatwaves that devastate coral reefs Human activities like sewage discharge overfishing navigation channel dredging land reclamation the construction of shipping ports and marine plastics are also responsible for coastal pollution and degradation Therefore a good understanding of the current state of coastal environments and lessons learnt from these human influences is extremely valuable to restore and protect these habitats and ecosystems from further environmental degradation and even catastrophe In this book case studies are used to tell a story about how these environments respond to severe human induced perturbations and what has gone right and wrong from environmental and resource management point of view The readership of the book include high level undergraduate Oceanography students and workers from Coastal Engineering and Management

**Recent Advances in Geographic Information System for Earth Sciences** Yosoon Choi,2020-06-23 Geographic information systems GISs have played a vital role in Earth sciences by providing a powerful means of observing the world and various tools for solving complex problems The scientific community has used GISs to reveal fascinating details about the Earth and other planets This book on recent advances in GIS for Earth sciences includes 12 publications from esteemed research groups worldwide The research and review papers in this book belong to the following broad categories Earth science informatics geoinformatics mining hydrology natural hazards and society **GeoWorld** ,2008 Wildlife Research ,2015 **ERDAS Imagine product guide** ,1995 Product Guide ERDAS (Firm),CHEST (Organization),University of Manchester.
