Branching and Rooting Out with a CT Scanner: The Why, the How, and the Outcomes, Present and Possibly Future Pierre Dutilleul, Jonathan A. Lafond, 2016-04-13 Until recently a majority of the applications of X ray computed tomography CT scanning in plant sciences remained descriptive some included a quantification of the plant materials when the root soil isolation or branch leaf separation was satisfactory and a few involved the modeling of plant biology processes or the assessment of treatment or disease effects on plant biomass and structures during growth In the last decade repeated CT scanning of the same plants was reported in an increasing number of studies in which moderate doses of X rays had been used Besides the general objectives of Frontiers in Plant Science research topics Branching and Rooting Out with a CT Scanner was proposed to meet specific objectives i providing a non technical update on knowledge about the application of CT scanning technology to plants starting with the type of CT scanning data collected CT images vs CT numbers and their processing in the graphical and numerical approaches ii drawing the limits of the CT scanning approach which because it is based on material density can distinguish materials with contrasting or moderately overlapping densities e g branches vs leaves roots vs non organic soils but not the others e g roots vs organic soils iii explaining with a sufficient level of detail the main procedures used for graphical quantitative and statistical analyses of plant CT scanning data including fractal complexity measures and statistics appropriate for repeated plant CT scanning in experiments where the research hypotheses are about biological processes such as light interception by canopies root disease development and plant growth under stress conditions iv comparing plant CT scanning with an alternative technology that applies to plants such as the phenomics platforms which target leaf canopies and v providing current and potential users of plant CT scanning with up to date information and exhaustive documentation including clear perspectives and well defined goals for the future for them to be even more efficient or most efficient from start in their research work **Mastering the Model Shoot** Frank Doorhof, 2013-11-05 For the first time ever world famous photographer and fashion lighting instructor Frank Doorhof takes you behind the scenes to reveal every step of his model photography workflow the same workflow that has made him a hero to photographers around the world thanks to his practical budget conscious no nonsense approach In this groundbreaking book Frank starts right at the beginning with how to find models find great locations work with backgrounds you ll be amazed at his tricks for creating stunning backgrounds for just a few bucks and work by yourself or with a team stylist hair stylist and makeup artist to create an image that will get your photography noticed Then it s on to an in depth look at the lighting setups and looks that made Frank famous complete with diagrams and detailed explanations You ll see how Frank lights his images you ll be shocked at how simple most of his lighting setups are and you ll be able to create these same setups yourself plus he covers the critical little stuff nobody else is talking about including how to calibrate your monitor and why it s so important how to use a color target to nail your color every single time and why and how to use a light meter to

get consistent reproducible lighting each and every shoot Frank also shares his own retouching techniques through step by step tutorials and he takes you from start to finish through a number of different looks so you can see exactly how it's done and recreate these same looks yourself If you've ever wished there was one book that covers it all the whole process of photographing models from start to finish not leaving anything out then this is the book for you
