Security Risk Management - The Driving Force for Operational Resilience Jim Seaman, Michael Gioia, 2023-08-31 The importance of businesses being operationally resilient is becoming increasingly important and a driving force behind whether an organization can ensure that its valuable business operations can bounce back from or manage to evade impactful occurrences is its security risk management capabilities In this book we change the perspective on an organization's operational resilience capabilities so that it shifts from being a reactive tick box approach to being proactive The perspectives of every chapter in this book focus on risk profiles and how your business can reduce these profiles using effective mitigation measures The book is divided into two sections 1 Security Risk Management SRM All the components of security risk management contribute to your organization's operational resilience capabilities to help reduce your risks Reduce the probability likelihood 2 Survive to Operate If your SRM capabilities fail your organization these are the components that are needed to allow you to quickly bounce back Reduce the severity impact Rather than looking at this from an operational resilience compliance capabilities aspect we have written these to be agnostic of any specific operational

resilience framework e.g. CERT RMM ISO 22316 SP 800 160 Vol 2 Rev 1 etc with the idea of looking at operational resilience through a risk management lens instead. This book is not intended to replace these numerous operational resilience standards frameworks but rather has been designed to complement them by getting you to appreciate their value in helping to identify and mitigate your operational resilience risks. Unlike the cybersecurity or information security domains, operational resilience looks at risks from a business-oriented view so that anything that might disrupt your essential business operations are risk-assessed and appropriate countermeasures identified and applied. Consequently, this book is not limited to cyberattacks or the loss of sensitive data but instead looks at things from a holistic business-based perspective.
