Ferritti Manual:

Forest Monitoring Davide Travaglini, Gherardo Chirici, Francesca Bottalico, Marco Ferretti, Piermaria Corona, Anna Barbati, Lorenzo Fattorini, 2013-03-16 Strategic planning of forest resources in Europe requires reliable information on the status and trend of forest condition National Forest Inventories NFIs and Forest Condition Monitoring FCM networks are primary sources of data for large area assessments of forest resources This contribution seeks to outline a statistical perspective for the construction of a European forest monitoring system able to provide statistically sound estimates of forest condition defoliation parameters and of their changes over time Monitoring objectives parameters of interest and accuracy indexes are presented under the assumption that a common definition for forests is adopted by European countries The proposed estimators are of two types i based solely on information acquired from FCM and ii derived from integration of FCM and NFIs

Forest Monitoring, 2013-03-16 The demand for comparable long term high quality data on forest ecosystems status and changes is increasing at the international and global level Yet sources for such data are limited and in many case it is not possible to compare data from different monitoring initiatives across space and time because of methodological differences Apart from technical manuals there is no comprehensive multidisciplinary scientific peer reviewed reference for forest monitoring methods that can serve and support the user community This book provides in a single reference the state of the art of monitoring methods as applied at the international level The book present scientific concepts and methods that form the basis of the transnational long term forest monitoring in Europe and looks at other initiatives at the global level Standardized methods that have been developed over two decades in international forest monitoring projects are presented Emphasis is put on trans nationally harmonized methods related data quality issues current achievements and on remaining open questions A comprehensive overview of needs requirements organization and possible outcomes of an integrated monitoring program Tested and quality assured internationally harmonized methodologies based on a complete revision of existing methods carried out in 2009 2011 Connection with monitoring results allows assessment of the potential of the monitoring method
