Means, 2001-08-21 *E-Government 2001* provides in depth case studies of the state of e government today The book chronicles the early days of e government and presents a collective snapshot in time as to where governments at the federal state and local levels are today as they continue their march toward e government Case studies include analysis of the use of auction models by government privacy strategies for e government e commerce applications in government the use of the Internet to deliver government services and a study of how state employment agencies are using technology to provide improved service From these case studies Mark A Abramson and Grady E Means develop six initial lessons which government leaders should know before undertaking major e government initiatives The lessons should prove valuable to all executives who aspire to transform their organizations from traditional bureaucracies to e enabled organizations

The Digital Doctor: Hope, Hype, and Harm at the Dawn of Medicine's Computer Age Robert Wachter, 2015-04-10 The New York Times Science Bestseller from Robert Wachter Modern Healthcare's 1 Most Influential Physician Executive in the US While modern medicine produces miracles it also delivers care that is too often unsafe unreliable unsatisfying and impossibly expensive For the past few decades technology has been touted as the cure for all of healthcare's ills But medicine stubbornly resisted computerization until now Over the past five years thanks largely to billions of dollars in federal incentives healthcare has finally gone digital Yet once clinicians started using computers to actually deliver care it dawned on them that something was deeply wrong Why were doctors no longer making eye contact with their patients How could one of America's leading hospitals give a teenager a 39 fold overdose of a common antibiotic despite a state of the art computerized prescribing system How could a recruiting ad for physicians tout the absence of an electronic medical record as a major selling point Logically enough we've pinned the problems on clunky software flawed implementations absurd regulations and bad karma It was all of those things but it was also something far more complicated And far more interesting Written with a rare combination of compelling stories and hard hitting analysis by one of the nation's most thoughtful physicians *The Digital Doctor* examines healthcare at the dawn of its computer age It tackles the hard questions from how technology is changing care at the bedside to whether government intervention has been useful or

destructive And it does so with clarity insight humor and compassion Ultimately it is a hopeful story We need to recognize that computers in healthcare don t simply replace my doctor s scrawl with Helvetica 12 writes the author Dr Robert Wachter Instead they transform the work the people who do it and their relationships with each other and with patients Sure we should have thought of this sooner But it s not too late to get it right This riveting book offers the prescription for getting it right making it essential reading for everyone patient and provider alike who cares about our healthcare system Business Periodicals Index ,2003 **Writing in an Electronic World** Beth E. Kolko,Alison E. Regan,Susan Romano,2001 We live work and write in an electronic connected world Writing in an Electronic World is the solution for writing educators who need a guide to how new technologies can best affect both writing instruction and writing communities Designed for both new users of technology and early adopters the book is a rigorous examination of writing and technologies that provides a thoughtful and measured pedagogy and will help students write effective prose By combining traditional rhetorical instruction with critical assessments of new opportunities created by the Internet Writing in an Electric World prepares students for the real experiences and demands of the evolving literate world Modeling Cooperative Behavior in the Social Sciences American Institute of Physics,2005-08-09 These papers were peer reviewed The Granada Seminar is defined as a small topical conference whose pedagogical effort is especially aimed at young researchers This year s seminar covered the modelling of complex systems that are of interest in the social sciences In an effort to offer pedagogical notes each topic is comprehensively described and some practical exercises are proposed This helps introduce non experts to novel advances in statistical physics and to the creative use of computers in scientific research as well as to serve as a work of reference for teachers students and researchers *Poets & Writers* ,2003 **E-commerce** Henry Chan,2001 E commerce involves a range of different computing technologies including networking security programming human computer interface design and database design This book provides a broad approach to the subject through its coverage of key technologies and discussion of how to integrate them
