Stochastic Modeling and Control Ivan Ivanov, 2012-11-28 Stochastic control plays an important role in many scientific and applied disciplines including communications engineering medicine finance and many others It is one of the effective methods being used to find optimal decision making strategies in applications The book provides a collection of outstanding investigations in various aspects of stochastic systems and their behavior The book provides a self contained treatment on practical aspects of stochastic modeling and calculus including applications drawn from engineering statistics and computer science Readers should be familiar with basic probability theory and have a working knowledge of stochastic calculus PhD students and researchers in stochastic control will find this book useful *Orthogonal Frequency Division Multiple Access Fundamentals and Applications* Tao Jiang, Lingyang Song, Yan Zhang, 2010-04-21 Supported by the expert level advice of pioneering researchers Orthogonal Frequency Division Multiple Access Fundamentals and Applications provides a comprehensive and accessible introduction to the foundations and applications of one of the most promising access technologies for current and future wireless networks It includes authoritative coverage Multiple Access Technologies for 5G Jie Zeng, Xin Su, Bin Ren, Lin Liang, 2021-06-08 Starting with an overview of current research progresses on multiple access technology the book then presents the theoretical fundamentals technical principles transmission scheme key technologies and evaluation results of new multi access technologies especially focusing on its typical applications 5G communication systems With extensive practical cases it is an essential reference for researchers engineers and graduate students

Systems Engineering Approach to Medical Automation Robin Felder, Majd Alwan, Mingjun Zhang, 2008 The book offers you a solid understanding of medical automation principles and the latest applications in the field You discover how computers and devices can be used to schedule personnel and services and help maintain a just in time lean and more affordable medical services You learn how to automate your pharmacy and laboratory services for maximum profit and minimum turnaround time Moreover this forward looking book helps you determine how nanotechnology is evolving to solve difficult medical challenges *Cognitive Dynamics on Clausewitz Landscapes* Rodrick Wallace, 2019-08-20 This book applies cutting edge methods from cognitive and evolutionary theories to develop models of conflict between hierarchically structured cognitive entities under circumstances of imprecision uncertainty and stress Characterized as friction and the fog of war by the Prussian military theorist Carl von Clausewitz such conditions impair institutional cognition in real time conflict and pose a real and continuing threat to organizations such as the US military In a linked collection of formal essays and a mathematical appendix the book explores different aspects of cognitive and evolutionary process as conducted under the direction of doctrine that acts as a kind of genome for retention of what is learned through Lamarckian evolutionary selection pressures armies and corporate entities learn from conflict and incorporate that learning into their ongoing procedures The book proposes models and policy solutions for strategic competence A central feature of the book is a formal description of

the famous OODA loop of the US military theorist John Boyd in terms of the Data Rate Theorem that links control and information theories. That description is expanded to cover more fully the impact of stochastic fog of war effects on tactical and operational scales of conflict. Subsequent chapters examine in more detail the role of doctrine and the particular effect of embedding culture on cognitive and Lamarckian evolutionary processes associated with conflict on tactical operational and strategic scales and levels of organization. A scientifically sophisticated exercise in applied mathematics history evolutionary theory and ecosystem theory this book will be appropriate for researchers and students interested in defense security and international relations as well as non academic career professionals in government and industry.

Control, Mechatronics and Automation Technology Dawei Zheng, 2015-12-30 This proceedings volume contains selected papers presented at the 2014 International Conference on Control Mechatronics and Automation Technology ICCMAT 2014 held July 24-25, 2014 in Beijing, China. The objective of ICCMAT 2014 is to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world.

Advances and Applications of DSMT for Information Fusion. Collected Works, Volume 5 Florentin Smarandache, Jean Dezert, Albena Tchamova, This fifth volume on Advances and Applications of DSMT for Information Fusion collects theoretical and applied contributions of researchers working in different fields of applications and in mathematics and is available in open access. The collected contributions of this volume have either been published or presented after disseminating the fourth volume in 2015 available at fs.unm.edu/DSMTbook4.pdf or www.onera.fr/sites/default/files/2015-DSMTBook4.pdf in international conferences, seminars, workshops and journals or they are new. The contributions of each part of this volume are chronologically ordered. First Part of this book presents some theoretical advances on DSMT dealing mainly with modified Proportional Conflict Redistribution Rules PCR of combination with degree of intersection coarsening techniques interval calculus for PCR thanks to set inversion via interval analysis SIVIA rough set classifiers canonical decomposition of dichotomous belief functions fast PCR fusion fast inter criteria analysis with PCR and improved PCR5 and PCR6 rules preserving the quasi neutrality of quasi vacuous belief assignment in the fusion of sources of evidence with their Matlab codes. Because more applications of DSMT have emerged in the past years since the apparition of the fourth book of DSMT in 2015 the second part of this volume is about selected applications of DSMT mainly in building change detection object recognition quality of data association in tracking perception in robotics risk assessment for torrent protection and multi criteria decision making multi modal image fusion coarsening techniques recommender system levee characterization and assessment human heading perception trust assessment robotics biometrics failure detection GPS systems inter criteria analysis group decision human activity recognition storm prediction data association for autonomous vehicles identification of maritime vessels fusion of support vector machines SVM Silx Furtif RUST code library for information fusion including PCR rules and network for ship classification. Finally the third part presents interesting contributions related to belief functions in general published or presented along the years since 2015. These contributions are

related with decision making under uncertainty belief approximations probability transformations new distances between belief functions non classical multi criteria decision making problems with belief functions generalization of Bayes theorem image processing data association entropy and cross entropy measures fuzzy evidence numbers negator of belief mass human activity recognition information fusion for breast cancer therapy imbalanced data classification and hybrid techniques mixing deep learning with belief functions as well

Nature ,1893 *London* Robert K. Batchelor,2020-03-04 A historian recounts the unlikely rise of a world capital and how its understanding of Asia played a key role If one had looked for a potential global city in Europe in the 1540s the most likely candidate would have been Antwerp which had emerged as the center of the German and Spanish silver exchange as well as the Portuguese spice and Spanish sugar trades It almost certainly would not have been London an unassuming hub of the wool and cloth trade with a population of around 75 000 still trying to recover from the onslaught of the Black Plague But by 1700 London s population had reached a staggering 575 000 and it had developed its first global corporations as well as relationships with non European societies outside the Mediterranean What happened in the span of a century and half And how exactly did London transform itself into a global city London s success Robert K Batchelor argues lies not just with the well documented rise of Atlantic settlements markets and economies Using his discovery of a network of Chinese merchant shipping routes on John Selden s map of China as his jumping off point Batchelor reveals how London also flourished because of its many encounters engagements and exchanges with East Asian trading cities Translation plays a key role in Batchelor s study not just of books manuscripts and maps but also of meaning and knowledge across cultures He demonstrates how translation helped London understand and adapt to global economic conditions Looking outward at London s global negotiations Batchelor traces the development of its knowledge networks back to a number of foreign sources and credits particular interactions with England s eventual political and economic autonomy from church and King London offers a much needed non Eurocentric history of London first by bringing to light and then by synthesizing the many external factors and pieces of evidence that contributed to its rise as a global city It will appeal to students and scholars interested in the cultural politics of translation the relationship between merchants and sovereigns and the cultural and historical geography of Britain and Asia
