Elephants Edge The Republicans As A Ruling Party:

Elephant's Edge Andrew J. Taylor, 2005-08-30 The Republican Party currently enjoys an edge The advantage can be seen in Congress state politics judicial rulings foreign and domestic policy party finances the media public attitudes and economic and demographic developments Yet the Republicans do not seem capable of translating this into a durable electoral majority Conditions now exist within American politics that will facilitate the establishment of Republican rule Many of these conditions have ripened during the past decade They include rules governing elections and campaign finance shifts in core political values among the public that are consistent with Republican philosophy and fundamental social and economic changes in American society that are likely to increase the ranks of Republican voters The author explains in lucid engaging terms how Republicans have taken control of both houses of Congress and experienced a remarkable resurgence at the state level He explores how conservatives are utilizing the courts to simultaneously move policy rightward and mobilize sympathetic parts of the electorate He also examines social and economic changes to show how racial politics religiosity and the nature of work and wealth benefit today's Republican Party Republican rule should not be confused with Republican realignment These conditions will advantage Republicans in future elections and bring about consistent Republican control of government at all levels federal state and local executive legislative and judicial However current conditions do not guarantee the kind of enduring Republican majority many journalists and strategists have predicted Taylor explains the factors that will prohibit the Republicans from fully exploiting their advantages and dominating American politics the way the Democrats did in the 30 years following the New Deal These factors include internal and intractable tensions within the Republican Party the parties sophisticated political information gathering strategies and the innate risk aversion of the campaign industry
