time But it is also achievable I think what language learners need is a book that clearly lays out how to learn a language properly without arbitrary shortcuts or absurd time frames and silly distractions I have learned a bunch of European as well as non European languages and in this book I share both my insights as well as those of other successful language learners and some of the relevant linguistic findings The book has three parts 1 Introduction The Method 2 Main Part All the steps learners need to take from beginning to end and a systematic discussion of all aspects of the language journey 3 Final Part Miscellaneous Problems 37 short chapters that deal with the details problems and frequently asked questions To make the book as useful as possible there are three example cases Spanish Russian and Japanese which in turn are similar to Italian Ukrainian and Chinese etc Many people want to learn Spanish Russian or Japanese or one of the languages from their language families like French or other Romance or Asian languages This way readers understand how language learning generally works and they receive a meta plan and a blueprint they can use for their purposes Finally the concrete cases serve to make the whole thing as clear and applicable as possible I have learned quite a few languages myself I like doing it and with this book I want to help people who also want to do it

Growing up monolingual vs bilingual. Who is the better translator? Julien Appler, 2016-09-22 Essay from the year 2015 in the subject Interpreting Translating grade 2 0 University of Heidelberg IUED course bersetzungswissenschaft language English abstract At the IUED at Heidelberg University many different students from all over the world gather to learn and improve their translation abilities This is probably one of the places with the most students who grew up bilingual studying together However there are not only students who grew up bilingual but also students who grew up monolingual After studying for some time most of the students ask the question Who is the better translator There are several assumptions about growing up bilingual positive ones as well as negative ones Every single one can be found on the internet posted by people worrying about their own children or other children and it can also be found in various books about the

matter One of those assumptions is also Children who grow up bilingual will make great translators when they grow up so it is a legitimate question to ask who is better students who grew up bilingual or students who grew up monolingual and learned a second language later in life To investigate this matter many questions have to be analyzed The main question is about the issue of growing up mono or bilingual and becoming a translator In order to analyze this question it is best to divide the analysis into several sub points The first point addresses the following areas the definition of mono and bilingual the brain activity and development of children who grew up monolingual compared to children who grew up bilingual the pedagogical question of how children learn how adults learn and do children really learn languages better and faster than adults and if no how can adults have the same learning success as children The second regards the translator What does it mean to be a translator and what abilities are important to be one Is it enough to know languages just as a foreigner or does the translator have to be a native speaker of both languages he or she translates
