Elementary Hydraulics James F. Cruise, Mohsen M. Sherif, Vijay P. Singh, 2007 *Elementary Hydraulics* is written for the undergraduate level and contains material to appeal to a diversified class of students. The book is divided into three parts: blends fluid mechanics, hydraulic science and hydraulics engineering. The first part of the text draws upon fluid mechanics and summarizes the concepts deemed essential to the teaching of hydraulics. The second part builds on the first section while discussing the science of hydraulics. The third section looks at the engineering practice of hydraulics and illustrates practical applications of the material covered in the text. In addition to these applications, the text contains a number of numerical problems and a reading aid at the end of each chapter to enhance student learning.

Planning and Evaluation of Irrigation Projects Raveendra Kumar Rai, Vijay P. Singh, Alka Upadhyay, 2017-04-06 *Planning and Evaluation of Irrigation Projects: Methods and Implementation* presents the considerations, options and factors necessary for effective implementation of irrigation strategies, going further to provide methods for evaluating the efficiency of systems in place for remedial correction as needed. As the first book to take this lifecycle approach to agricultural irrigation, it includes real world examples not only on natural resource availability concerns but also on financial impacts and measurements. With 21 chapters divided into two sections, this book is a valuable resource for agricultural and hydrology engineers, conservation scientists and anyone seeking to implement and maintain irrigation systems. Uses real world examples to present practical insights. Incorporates both planning and evaluation for full scope understanding and application. Illustrates both potential benefits and limitations of irrigation solutions. Provides potential means to increase crop productivity that can result in improved farm income.
