Let evidence and integrity be your guide to enhancing students' best interests and learning success. *Best Practices in Grading. Research Into Practice* Howard Johnston, 2011. Grading is one of the most enduring features of schooling. No matter what other reforms occur in a school, grading remains as one of the cornerstones of educational practice. But recently this long-standing tradition has come under scrutiny with some alarming results. Many traditional grading practices actually depress achievement and may in fact even lead to school failure and dropping out. Indeed, in his engaging video presentation on toxic grading practices, Doug Reeves says that two of the most common practices—averaging and giving zeros for missing work—are an academic death sentence. Fortunately, there is a lot of guidance for school leaders and faculty on how to structure meaningful, helpful grading systems that actually promote student achievement. From the resources provided at the end of this brief, schools can construct a list of best practices for their own setting. These include: 1. Start the Conversation, 2. Determine the Audience, 3. Establish Standards-Based Rubrics, 4. Eliminate Toxic Grading Practices, 5. Allow Retakes and Updating of Assessments, and 6. Don't Penalize Practice. Contains 7 online resources. *Charting a Course to Standards-Based Grading* Tim R. Westerberg, 2016-08-24. What's the best way to ensure that grading policies are fair, accurate, and consistent across classrooms? How can schools transition to a grading system that better reflects what students are actually learning? Tim R. Westerberg makes this journey easier by offering a continuum of options with four destinations on the road to improved grading and assessment. Destination 1 critically examines such popular grading mechanisms as the zero, extra credit, the semester killer, project averaging, mixing academic performance with work ethic, and refusing to accept late work, and explains how they undermine objectivity and instead result in widely divergent grades for comparable work with major consequences for students. Destination 2 invites educators to put assessment and grading into the larger context of a districtwide, guaranteed, and viable curriculum and lays out the organizational conditions and necessary steps to accomplish this goal. Destination 3 brings parents and others on board with a multiyear implementation plan and community engagement strategies for introducing report cards that indicate student achievement by standards rather than or in addition to letter grades. Destination 4, competency-based education, involves a total rethinking of the nature and structure of school, leading to individualized education for all students. However far they choose to go, administrators and teacher leaders can turn to *Charting a Course to Standards-Based Grading* for the quick wins and long-term support and guidance they need to make the trip well worth the effort. *A School Leader's Guide to Standards-Based Grading* Tammy Heflebower, Jan K. Hoegh, 2014-05-30. Accurately report students' academic strengths and weaknesses with standards-based grading. Rather than using traditional systems that incorporate nonacademic factors such as attendance and behavior, learn to assess and report student performance based on prioritized standards. You will discover reliable, practical methods for analyzing what students have learned and gain effective strategies for offering students feedback on their progress. **Effective Grading Practices**
