Elements Of Self Destruction:

Elements of Self-Destruction Brent Potter, 2018-04-17 The stated purpose of this phenomenological psychoanalytic study is to make the phenomenon of self destruction and its vicissitudes intelligible It presents the nature of the relationship between the essence of technology and the essence of self destructiveness *Elements of Self-Destruction: A Thematic Hermeneutic Study* Brent Curtis Potter, 2005 This phenomenological study examined the ontic and ontological vicissitudes of self destruction Why are humans who are motivated by self preservation motivated to engage in behaviors that threaten and even extinguish their existence The present study has given thought to this question and examined the phenomenon of self destruction through the perspectives of empirical psychology psychoanalysis analytical psychology as well as existential phenomenological psychology A thematic hermeneutic method was employed to explore the phenomenon of self destruction as the subject matter asks for a method in which reflection and dialectic can increase awareness and understanding Regarding the hermeneutic aspect of this study I first presented the predominant themes of the study Each theme was a chapter revolving around the central theme of self destructiveness These themes included 1 the emerging understanding of self destructiveness in culture religion philosophy and psychology 2 Bion's investigation into the self destructive capacity of the mind 3 Heidegger's ontology of Being and the Enframing of technology 4 identifying and delineating the who who most experiences the impact of human to human destructiveness in our contemporary culture The phenomenon of disposable children was delineated as well as other ways children suffer from contemporary self destructiveness such as child trafficking A case vignette presented a case of one such disposable child to offer a more salient understanding of what such children often have to endure to survive This study then presented the nature of the relationship between the essence of technology and the essence of self destructiveness The dissertation outlined the ways Heidegger and Bion may benefit from each other's perspectives on this score It also delineated the shadow of Being and the seduction of self destructiveness The study presented three examples of this pornography manifest destiny and the holocaust The notation X was suggested as another way to give thought to the phenomenon of self destruction and as an organizing sign for the many elements explored in the study This dissertation concluded by discussing the necessity of having a relationship to the phenomenon of self destructiveness without it holding sway *The Arena*, 1908 *Country Guide and Northwest Farmer*, 1908 **German Idealism and the Concept of Punishment** Jean-Christophe Merle, 2015-12-17 Examines the views of the German Idealists on punishment and traces their gradual move in favour of deterrence and resocialisation **Genealogy, Psychology and Therapy** Paula Nicolson, 2022-07-15 Fully revised and updated Genealogy Psychology and Therapy highlights the importance of genealogy in the development of identity and the therapeutic potential of family history in cultivating wellbeing The popularity of amateur genealogy and family history has soared in recent times We will never know any of the people we discover from our histories in person but for several reasons we recognize that their lives shaped ours Key approaches to

identity and relationships lend clues to our own lives but also to what psychosocial factors run across generations Attachment and abandonment trusting being let down becoming independent migration health and money all resonate with the psychological experiences that define the outlooks personalities and the ways that those who came before us related to others This new edition builds on the original book *Genealogy Psychology and Identity* by highlighting the work of Erik Erikson along with studies of the quality of attachment historical social conditions especially war forced migration health inequalities and financial uncertainty to enable a more detailed understanding of trauma and its long shadow and to focus on how genealogy informs our identities and emotional health status exploring the transmission of trauma across generations The intergenerational transmission of trauma is examined using analysis of real life family examples alongside an assessment of a narrative therapy approach to healing The book expands on how psychological practices together with genealogical evidence may impart resilience and emotional repair and develops the discussion of the psychological methods by which we interconnect in a reflective way with material from archival databases family stories and photographs and other sources including DNA Showing how people can connect with archival material using documents and texts to expand their knowledge and understanding of the psychosocial experiences of their ancestors this book will be of interest to those researching their own family tree genealogists and counsellors as well as students and researchers in social psychology and social history
