Early Explorations In Science Exploring Primary Science And Technology:

Early Explorations In Science Johnston, Jane, 2005-07-01 Reviewers comments on the first edition Jane Johnston communicates a sense of effervescent enthusiasm for teaching and science and her treatment is comprehensive TES The ideas and recommendations based on considerable classroom experience make this book a valuable aid to students and reflective early years practitioners Primary Science Review At last A serious attempt to explore the scientific potential of infant and pre school children The author explains how scientific skills can be developed at an early stage stimulating the natural inquisitive streak in children This book will start you thinking about science in a much more positive light Child Education This accessible and practical book supports good scientific practice in the early years It helps practitioners to be creative providers and shows them how to develop awe and wonder of the world in the children they teach The book highlights the importance of a motivating learning environment and skilled interaction with well trained adults In addition fundamental issues are explored such as the range nature and philosophical underpinning of early years experiences and the development of emergent scientific skills understandings and attitudes New features for this edition include An extended age range encompassing early learning from 0 8 Updated material for the Foundation Stage Curriculum for 3 5 year olds and the National Curriculum 2000 for 5 8 year olds A new chapter focusing on conceptual understanding and thinking skills in the early years An emphasis on the importance of informal learning and play in early development The book introduces and discusses new research and thinking in early years and science education throughout making it relevant for current practice This is an indispensable resource for all trainee and practising primary school teachers and early years practitioners

Creativity In Primary Science Frost, Jenny, 1997-01-01 How do primary teachers incorporate all the facets of science in their teaching How do primary teachers plan and replan their science teaching in the light of how children are learning How do primary teachers retain lively and imaginative science teaching within the constraints of a specified curriculum This book is about the very best of primary classroom practice in science six teachers six schools six science topics with children from ages five to eleven years The teaching and children s learning are described in a straightforward style richly illustrated by pen and ink drawings made from photographs and by examples of children s work The author has provided a commentary on the particular classroom examples by linking them to a wider discussion of science in primary schools and by sharing the teachers own rationale for their decisions The book was written initially for beginning teachers but experienced teachers who reviewed the drafts welcomed the combination of real classroom examples coupled with a more theoretical commentary Above all they welcomed the essence of the book which as the opening sentence indicates is about creativity in teaching and a celebration of the skills and expertise of primary teachers in the area of science The book will be invaluable reading for both trainee and practising primary school teachers

Understanding Schemas in Young Children Stella Louis, Clare Beswick, Sally

Featherstone,2013-06-20 What are schemas and why do they matter Again Again provides an introduction to understanding and supporting schemas and schema play in young children Practitioners will find an overview of schemas with guidance on where they fit within the EYFS There are examples of schemas with illustrations and descriptions of common behaviour patterns and these are set within the general context of child development The intention is to help early years practitioners identify schemas and to understand both how important they are and the vital role they play in the growing child s learning The aim is to help the reader understand how they can develop plan and resource activities which support children s learning through experiment and play
