the quality of life for many people global inequality of resources as well as concerns over consumerism and excessive individualism also threaten the good order of creation writes Pope Francis While valuing technology and innovation he rejects efforts to repudiate the natural order including the moral law inscribed in human nature or to rely simply on science to solve ecological problems Moral and spiritual resources are crucial including openness to God's purpose for the world Expounding the biblical tradition regarding creation and redemption in Christ Francis stresses man's subordination to God's plan and the universal communion of all creation Dominion he maintains means responsible stewardship rather than exploitation He rejects treating creation as if it were divine and insists on the primacy of the human person in creation He also explores the roots of the ecological crisis in man's abuse of technology his self-centeredness and the rise of practical relativism Without rejecting political changes he implores people to change their hearts and their ways of life Popes Benedict XVI St John Paul II and Blessed Paul VI addressed key themes regarding stewardship of God's creation and justice in the world But Pope Francis is the first to devote an entire encyclical to the subject *Laudato Si' and the Environment* Robert McKim, 2019-09-11 This volume is a response to Pope Francis environmental encyclical *Laudato Si* Published in 2015 the encyclical urges us to face up to the crisis of climate change and to take better care of the Earth our common home while also attending to the plight of the poor In this book the Pope's invitation to all people to begin a new dialogue about these matters is considered from a variety of perspectives by an international and multidisciplinary team of leading scholars There is discussion of the implications of *Laudato Si* for immigration population control eating animals and property ownership Additionally indigenous religious perspectives development and environmental protection and the implementation of the ideas of the encyclical within the Church are explored Some chapters deal with scriptural or philosophical aspects of the encyclical Others focus on central concepts such as interconnectedness the role of practice and what Pope Francis calls the technocratic paradigm This book expertly illuminates the relationship between *Laudato Si* and environmental concerns It will be of deep interest to anyone studying religion and the environment environmental ethics Catholic theology or environmental thought **Encyclical Letter *Laudato Si'* of Holy Father Francis on Care of Our Common Home.**, 2015-10-05

Humans are causing climate change and there will be Grave Consequences if we don't act fast *The Eucharistic Vision of *Laudato Si** Lucas Briola, 2022-12-28 No other encyclical has generated as much conversation both Catholic and non Catholic as *Laudato si* Often forgotten in these conversations is the theological heart and eucharistic vision of the encyclical and its integral ecology Even the title of *Laudato si* Praised be signals the centrality of right praise in caring for our common home Using Bernard Lonergan's theology of history this book unearths the doxological eucharistic vision that shapes the encyclical's integral presentation of social and ecological conversion It offers the first book length study that recovers the eucharistic nature of *Laudato si* In drawing out the eucharistic vision of *Laudato si* the book accomplishes several feats for the reader It roots the eucharistic dimensions of the encyclical in the writings of Popes John Paul II and Benedict XVI showing how Pope

Francis develops their thought in notable ways It introduces Bernard Lonergan's theology of history showing how his framework can capture the eucharistic contours of caring for our common home so too in light of *Laudato si* does the book expand his theology of history to incorporate both ecological concern and the doxological eucharistic essence of the church The book assembles a liturgically shaped systematic account of the church's social mission It joins poles otherwise sundered in a polarized church and world between worship and justice between concerns for human life and concerns for the natural world Realizing the eucharistic vision of *Laudato si* promises much for our contemporary moment Pope Francis recently observed that the integral ecology of *Laudato si* holds the key for the world's recovery from the COVID 19 pandemic The U S Catholic Bishops recently launched a Eucharistic Revival that aims to rekindle eucharistic devotion and praxis The Eucharistic Vision of *Laudato Si* Praise Conversion and Integral Ecology supplies a timely study that helps fulfill these intertwined calls

Church, Cosmivision and the Environment Evan Berry, Robert Albrow, 2018-06-27 Though currently only partially understood evolving interactions among Latin American communities of faith governments and civil societies are a key feature of the popular mobilizations and policy debates about environmental issues in the region This edited collection describes and analyses multiple types of religious engagement with environmental concerns and conflicts seen in modern Latin American democracies This volume contributes to scholarship on the intersections of religion with environmental conflict in a number of ways Firstly it provides comparative analysis of the manner in which diverse religious actors are currently participating in transnational national and local advocacy in places such as Peru Argentina Brazil Bolivia Ecuador Guatemala and Mexico It also considers the diversity of an often plural religious engagement with advocacy including Catholic Evangelical and Pentecostal perspectives alongside the effects of indigenous cosmological ideas Finally this book

explores the specific religious sources of seemingly unlikely new alliances and novel articulations of rights social justice and ethics for the environmental concerns of Latin America The relationship between religion and environmental issues is an increasingly important topic in the conversations around ecology and climate change This book is therefore a pertinent and topical work for any academic working in Religious Studies Environmental Studies and Latin American Studies
