Endall Beall:

Advanced Teaching for the Second Cognition Mrs Endall Beall, 2016-06-21 In Volume 8 of the Evolution of Consciousness series Mrs Beall shares more of her insights in the form of questions and answers that both she and Endall have encountered from others they have worked with over the years as well as questions they have been asked about their Evolution of Consciousness series This volume gives the reader much to ponder on their individual journey towards the Second Cognition This book also includes a special contribution by Endall Beall *The Energy Experience* Endall Beall, 2015-07-05 This is the 5th book in the series The Evolution of Consciousness In this book Mrs Endall Beall shares her personal experiences on her path and discusses what she has learned about energy and the traits that most people view as supernatural This book is about evolving one's spiritual and cognitive awareness where spirit is concerned This book is about empowering one's self on their spirit path *Firestarters* Endall Beall, Gemma Beall, 2018-02-19 This is volume 7 of the Second Cognition series of books This volume contains transcripts from 32 Youtube videos produced by Gemma Beall on her Youtube channel by that name The transcripts contained herein were composed by both Endall and Gemma and produced for the public in 2017 These transcripts contain more defined explanations for understanding the road to the second cognition in greater detail than in the previous volumes of transcripts *The Spiritual Wasteland* Endall Beall, 2018-11-17 The original contents of this book first appeared as addendum chapters in *Advanced Teachings for the Second Cognition* by Mrs Endall Beall This revised and enhanced edition came about due to requests that this volume be released independently This volume contains additional content than what appeared in the original release This book is a criticism from firsthand experience of modern spiritual traditions and serves as a primer for the larger volume of material produced by these author's three separate series of books The Evolution of Consciousness series the Second Cognition series and the newly launched Beyond Second Cognition series For those individuals truly desiring to advance their consciousness the facts presented in this book must be faced and accepted before they can get unstuck in their spiritual growth process What is presented in this volume will make the reader uncomfortable yet there is no untruth contained within these pages If you are ready to step into the level of spiritual maturity then the information presented in this book is the first step on the road to that advancement This book is not written by an outside skeptic but by one who was mired in the trenches of the modern spiritual movement and who has advanced beyond it The author had to face the same uncomfortable facts that the reader will encounter in this book but there is a road forward to advanced human consciousness once one can move past the belief systems that permeate the modern spiritual wasteland

Introduction to the Multiverse Endall Beall, 2018-08-26 *Introduction to the Multiverse* is a synopsized version of some of the combined works of Endall Beall Although the overview provided in this book is large in scope filled with additional details for those who have followed Beall's work there is more to the story than what is presented in this volume for those wanting more details The material in this book is nothing if not challenging and controversial pushing the limits of our world

perception at this time Many will discount the book as fanciful but others will see the truth contained in the explanations provided in the book Although some may find the content questionable once the full volume is digested this book opens a new horizon to human understanding both to the origin of humanity and how our world arrived at its present state of conscious perception It is not a pretty picture to come face to face with for anyone but the author offers a solution for those wise enough to see the vision to alter our species for the better and take a new road for human cognitive advancement *The Inventor* Ronnie Lee Graham,2016-02-23 The Inventor tells the story of four entangled lives the Average Joe the General the Mistress and the General s wife Each unknowingly plays a role in the struggle of good against evil They go about their lives making decisions of their own free will while a larger chess match plays out in the background Ultimately the choices they make deciding to pursue an idea selecting a book choosing a repair shop going for a walk or even the split second decision of fight or flight impact the outcome Do the good guys win Perhaps but are the good guys who you expect them to be In chess one cannot control everything Sometimes a game takes an unexpected turn in which beauty begins to emerge Vladimir Kramnik Russian chess grandmaster and undisputed World Chess Champion from 2006 2007 *A Programmer's Rantings: On Programming-Language Religions, Code Philosophies, Google Work Culture, and Other Stuff* Steve Yegge,2012-12-01 This book grew out of a lot of angst Well and wine Put enough angst in me and I ll start ranting Pour in some wine and the rants get mean and funny I still go back and read these posts now and then and I always laugh I was so mean My angst grew out of traveling different roads than most programmers Those roads forced me to see the world differently Now I see all sorts of patterns that many experienced programmers fail to see because well to put it bluntly they re stuck in ruts Over the past 25 years I ve done a bunch of dramatically different types of programming and I ve also written far more code than any programmer ever should The long roads I ve traveled have basically given me a sixth sense I see dead people And it sucks If you re ever unlucky enough to acquire a dreadful sixth sense there are really only two choices you can be angry and depressed about it or you can laugh about it So I try to laugh It s hard but I m getting better at it The wine helps Practice helps too You need to get in the habit of laughing at yourself at others at the crazy world we live in or in time you ll just stop laughing altogether When I first started ranting I was the ugly American stomping around in my posts and essentially yelling What the hell is wrong with all you people But over the next ten years or so I like to think I ve grown into more of an amateur software anthropologist I now take cultural relativism seriously and I try hard not to judge people who think differently from me Of course I don t mind poking fun at them because I don t mind people poking fun at me And ultimately I would like to convince undecided programmers to share my view of the programming world because programming works best if everyone nearby does it the same way So I ll continue to argue that my view which I ve recently taken to calling software liberalism is a perfectly valid and perhaps even preferable way to do a lot of software development Converting everyone to be more liberal is doomed to fail of course But even so I hope I can still help people in radically different software cultures to understand

each other better I'm going to keep ranting because it appears to be the only way to make a message sink in to a very large audience. Some people still tell me that my blog posts are too long. They tell me I could have made my point in under a hundred words. I have noticed that this complaint comes most often from people who disagree with me. They're really just saying they want less work to voice their disagreement. But even some folks who agree with me find the posts too long to carry their attention and they complain too. They're missing the point though. The posts aren't too long. You need a certain minimum heft to penetrate. Through years of trial and error I've found that the best way to get a lot of people to listen to you is to tell them a story. And you can't spin a good yarn without settling in and enjoying the ride. So that's what this book is. It's really a bunch of stories. Each might take the form of an article, essay, guide, rant, or occasionally a fiction tale. But behind the structure, each one of them is sharing a story. Even if you don't always agree, I'm hoping you'll at least find the stories entertaining and with luck, sometimes even eye-opening. The guys at Hyperink chose which of my posts to include by and large, and they also came up with the overall chapter organization. I made a couple of tweaks, but what you're looking at is largely their vision of how to curate this stuff into a cohesive book. I think they did an admirable job. I hope you enjoy the journey as much as I did. Steve Yegge, August 2012

English, The Aussie Way Lynne Maree Walsh, 2016-01-28. Written by a Sydney native, English: The Aussie Way: A Fun Guide to Australia's Colourful Phrases, Words and Expressions offers an amusing way for English or non-English speakers around the world to learn the colloquial phrases for which Australia is famous. This user-friendly reference provides words, phrases, and meanings, synonyms by using an example sentence. Says the author, "For seven years I housed international students who were attending English language schools in Sydney, and I realised that although they had a good grasp of formal grammar, they struggled to understand not only colloquial English but many of the commonly used phrasal verbs which could not be found in a standard English, Spanish, French, etc. dictionary. It was then that I decided to start writing some of them down for future reference, and it grew from there."

The New Paradigm Transcripts Endall Beall,2016-04-25 The New Paradigm Transcripts are a compilation of transcripts that find their origins with the two authors working together to help advance human consciousness and introduce humanity to the concept that we are not living up to our species potential These transcripts came about as a result of a collaborative effort by both authors originally produced for Doug Michael s Youtube channel as educational documentaries This volume is the first presentation of The Second Cognition series of books This is a second companion series to The Evolution of Consciousness series of books by Endall Beall and Mrs Endall Beall with more advanced teachings for those who are willing to embrace the idea that they can be something more as a human being and that our species has the potential to expand our consciousness far beyond our present perceptions This series does not present the reader with any form of spiritual escapism or any doctrines of spiritual dependency In this first volume Endall Beall and Doug Michael take the bull by the horns and give the reader a very hard but pragmatic look at why all modern spiritual traditions come up short where their doctrines of human cognitive advancement are concerned The picture revealed in this first volume is not always a pretty scene to view and it will make many readers uncomfortable as their perceptual world is sorely challenged Aside from many uncomfortable truths this volume contains many messages of inspiration and guidance for those individuals who are not only ready but are willing to become active participants in shaping the direction for humanity to grow into from the standpoint of advancing human consciousness

The Cognitive Illusion of History Endall Beall,2017-08-23 This is the 5th volume of the Second Cognition series of books This is the last volume of the video transcripts produced by Endall Beall and Doug Michael This volume contains the balance of the previously unpublished transcripts from the authors video presentations on Doug Michael s Youtube channel Although this is 5th volume of the series it is a standalone presentation that does not require reading of the first four volumes in the series to get the benefit from reading it however all the books in the series combined offer a compendium of information that could be equaled to a study course for advancing human consciousness This volume also contains 6 bonus transcripts that never got produced into video format for public viewing This volume covers a wide range of historical topics

as well as addressing the impact of historical perceptions on society at large As with all the material in the Second Cognition series the transcripts also address the advancement of human consciousness into a more civilized mindset than the current climate of fear that controls the psyche of humanity at large Since these transcripts were originally produced Doug has closed down his Youtube channel and the videos can now be viewed on the Gemma Beall Youtube channel along with 40 new videos that were produced by Gemma and Endall Beall There will be a forthcoming volume with these 40 additional transcripts published in the not too distant future as part of this growing Second Cognition series
