Ghani, Mazurina Mohd Ali, Nor Farizal Mohammed, Kamaruzzaman Muhammad, Nassr Saleh Mohamad Ahmad, 2024-01-01 This textbook provides a comprehensive guide to accounting theory and aims to improve the reader's capacity to think critically about accounting and accounting challenges. It is intended for accounting students who are enrolled in an accounting theory course as well as those who want to pursue postgraduate accounting studies, namely a PhD. This textbook starts with an explanation of what accounting is, followed by its history and conceptual framework, before tying accounting to research. Subsequently, seven theories of accounting are selected and introduced as the accounting research community has made substantial use of these theoretical frameworks. In this textbook, too, applications of accounting theory to previous studies are provided. *Financial Accounting Theory* Craig Michael Deegan, 2023 **EBOOK Financial Accounting**

**Social and Environmental Disclosure by Chinese Firms** Yingjun Lu, Indra Abeysekera, 2024-11-01 Given the increased social and environmental problems in China, this book looks into the social and environmental disclosure practices of socially responsible Chinese listed firms by constructing a stakeholder-driven three-dimensional disclosure index. The book contains a three-part study: the first part explores the current status of social and environmental disclosure practices; the second part empirically examines the relationship between corporate social and environmental disclosure and various influencing factors, i.e., stakeholders' power and corporate characteristics; the third part empirically examines the link between corporate social responsibility (CSR) reporting, i.e., publishing a CSR report, and the quality of the CSR report and socially responsible reputation. The book finds that the CSR report provided more stakeholder-relevant social and environmental disclosure than the annual report. It also finds that corporate characteristics such as firm size, profitability, and industry classification are all statistically significant factors influencing the social and environmental disclosure of the Chinese firms studied. Shareholders significantly influenced firms' social and environmental disclosure, and creditors significantly influenced firms' disclosure related to their environmental performance. The final part of the study reports that publishing a CSR report and CSR reporting quality had a positive influence on firms' socially responsible reputations, and that CEO-chairman duality negatively influenced firms' socially responsible reputation. This book will be of interest to those who are keen to learn more about corporate social responsibilities in the context of Chinese firms.
