Less Pretension, More Ambition Peter van Lieshout, Robert Went, Monique Kremer, 2025-10-01 Development aid has become the subject of much discussion Why do we give aid and does it help What do we know about the development paths being taken by various countries or the possibilities of helping them to achieve their goals from outside How relevant is development aid now that remittances and foreign direct investments have increased as a result of globalization When does aid have more negative than positive effects What is the significance of shifting power relations in the world And do policies focusing on issues like climate migration financial stability knowledge trade and security not have a greater impact than aid on the development opportunities of poor countries These questions inspired the Dutch Scientific Council for Government Policy WRR to examine what form development aid should take in the era of globalization At the start of 2010 on the basis of over 500 interviews with experts and an extensive literature survey the WRR presented its far reaching recommendations In October 2010 the new Dutch government decided to use the report as the basis of a thorough modernization of its development policy This book is based on the WRR report It builds on the many responses to the report resulting in more elaboration on specific lines of reasoning coverage of new themes and more comprehensive analyses without changing the core of the original report

Employment, Inequality and Globalization Rolph van der Hoeven,2013-09-13 The nature of globalization and the fallout from the international financial crisis have brought profound changes to societies and economies around the world This book documents that over the last two decades the growth of nonstandard and informal employment has led to greater inequalities This is partly explained by the fact that adjustment policies in the 1980s market liberalization policies in the 1990s and more recently globalization and anti poverty policies did not pay sufficient attention to policies for employment and income redistribution As a response to these trends this book recommends the development of clearer policies for employment and income redistribution These policies should now become an integral part of national and international economic policy making This is even more relevant in the current context of the international financial crisis as Several elements of globalization especially the unfettered markets and the growing inequality have given cause to the current crisis and There is growing evidence that the employment human and social effects of the financial crisis will be felt well after an economic recovery has taken place especially if no corrective action is taken This volume will be of benefit to policymakers scholars and practitioners alike This book was published as a special issue of the Journal of Human Development and Capabilities
