**Clinical Reasoning and Decision Making in Physical Therapy** Gina Musolino, Gail Jensen, 2024-06-01 Clinical reasoning is an essential non negotiable element for all health professionals The ability of the health professional to demonstrate professional competence compassion and accountability depend on a foundation of sound clinical reasoning The clinical reasoning process needs to bring together knowledge experience and understanding of people the environment and organizations along with a strong moral compass in making sound decisions and taking necessary actions While clinical

reasoning and the role of mentors has been a focus of the continued growth and development of residency programs in physical therapy there is a critical need to have a broader in depth look at how educators across academic and clinical settings intentionally facilitate the development of clinical reasoning skills across one's career Clinical Reasoning and Decision Making in Physical Therapy Facilitation Assessment and Implementation fills this need by providing a comprehensive and in depth focus on development of the patient client management skills of clinical reasoning and clinical decision making It takes into account teaching and learning strategies assessment and technological applications across the continuum from novice to residents fellows in training along with academic and clinical faculty for both entry level and specialist practice Drs Gina Maria Musolino and Gail Jensen have designed this comprehensive resource with contributions from professional colleagues The text centers on life long learning by encouraging the development of clinical reasoning abilities from professional education through residency education The aim and scope of the text is directed for physical therapy education to enhance clinical reasoning and clinical decision making for developing professionals and post professionals in both clinical and academic realms and for the development of clinical and academic faculty Clinical Reasoning and Decision Making in Physical Therapy uniquely offers both evidence based approaches and pragmatic consultation from award winning authors with direct practice experiences developing and implementing clinical reasoning clinical decision making in practice applications for teaching students residents patients and clinical academic faculty in classrooms clinics and through simulation and telehealth Clinical Reasoning and Decision Making in Physical Therapy is the first of its kind to address this foundational element for practice that is key for real world practice and continuing competence as a health care professional Physical therapy and physical therapist assistant students faculty and clinicians will find this to be an invaluable resource to enhance their clinical reasoning and decision making abilities

*Vignettes in Patient Safety* Stanislaw P. Stawicki, Michael S. Firstenberg, 2018-09-05 Over the past decade it has been increasingly recognized that medical errors constitute an important determinant of patient safety quality of care and clinical outcomes Such errors are both directly and indirectly responsible for unnecessary and potentially preventable morbidity and or mortality across our healthcare institutions The spectrum of contributing variables or root causes ranging from minor errors that escalate poor teamwork and or communication and lapses in appropriate protocols and processes just to name a few is both extensive and heterogeneous Moreover effective solutions are few and many have only recently been described As our healthcare systems mature and their focus on patient safety solidifies a growing body of research and experiences emerges to help provide an organized framework for continuous process improvement Such a paradigm based on best practices and evidence based medical principles sets the stage for hardwiring the right things to do into our institutional patient care matrix Based on the tremendous interest in the first two volumes of The Vignettes in Patient Safety series this third volume follows a similar model of case based learning Our goal is to share clinically relevant practical knowledge that approximates

experiences that busy practicing clinicians can relate to Then by using evidence based approaches to present contemporary literature and potential contributing factors and solutions to various commonly encountered clinical patient safety scenarios we hope to give our readers the tools to help prevent similar occurrences in the future In outlining some of the best practices and structured experiences and highlighting the scope of the problem the authors and editors can hopefully lend some insights into how we can make healthcare experiences for our patients safer      **Medical-Surgical Nursing - E-Book**
