**Daniel J. Fairbanks**

## **Evolving The Human Effect And Why It Matters Daniel J Fairbanks:**

**Evolving** Daniel J. Fairbanks, 2012-05-22 This persuasive elegantly written book argues that understanding evolution has never mattered more in human history The author uses evidence from archaeology geography anatomy biochemistry radiometric dating cell biology chromosomes and DNA to establish the inescapable conclusion that we evolved and are still evolving He also explains in detail how health food production and human impact on the environment are dependent on our knowledge of evolution This is essential reading for gaining a fuller appreciation of who we are our place in the great expanse of life and the importance of our actions Evolving Daniel J. Fairbanks, 2012-05-22 In this persuasive elegantly written book research geneticist Fairbanks explains in detail how health food production and the environment impact our knowledge of evolution

The Human Instinct Kenneth R. Miller, 2019-04-23 From one of America's best known biologists a revolutionary new way of thinking about evolution that shows why in light of our origins humans are still special Edward J Larson Pulitzer Prize winning author of *Evolution* Once we had a special place in the hierarchy of life on Earth a place confirmed by the literature and traditions of every human tribe But then the theory of evolution arrived to shake the tree of human understanding to its roots To many of the most passionate advocates for Darwin's theory we are just one species among multitudes no more significant than any other Even our minds are not our own they tell us but living machines programmed for nothing but survival and reproduction In *The Human Instinct* Brown University biologist Kenneth R Miller confronts both lay and professional misconceptions about evolution Publishers Weekly starred review showing that while evolution explains how our bodies and brains were shaped that heritage does not limit or predetermine human behavior In fact Miller argues in this highly recommended Forbes work that it is only thanks to evolution that we have the power to shape our destiny Equal parts natural science and philosophy *The Human Instinct* makes an absorbing lucid and engaging case that it was evolution that gave us our humanity Ursula Goodenough professor of biology at Washington University in St Louis

**Science vs. Religion:** Guido O. Perez, 2015-04-01 Most people look to religion and science faith and reason for an explanation of everything that is but neither the scientific nor the religious system can actually provide all the answers to life's questions Is that really what we're looking for The author examines both science and religion in some detail and from a variety of standpoints A life long educator he indicates many avenues for further reading so that no one has to simply accept whatever his family or community traditions may have proposed One sticking point in most discussions of religion vs science is that few of us really have enough information about both positions and the myriad hybrid beliefs in between in order to make a proper evaluation As a professor of medicine and an avid investigator of these questions Dr Guido Perez offers some background and guidance The author explores the basics of theism and today's largest religions and gives a solid grounding in the facts and theoretical basis for evolution and the scientific approach to knowledge He then explores a possible place to stand in both morally and intellectually grounded while we puzzle out our existence a rational belief system that accounts for

what we can account for while recognizing those mysteries and existential questions we humans just can't seem to stop asking Dr Perez proposes a rational belief system grounded in natural science and humanism an approach where morality comes naturally not because we fear divine punishment but because we inherently understand what is good for humanity

God and Randomness Thomas R. McFaul, Al Brunsting, 2017-12-01 Most of us have experienced the impact of randomness in our lives not only as individuals but in our interactions with others as well In God and Randomness which is a sequel to our 2014 publication God Is Here to Stay Science Evolution and Belief in God we describe the connection between randomness and God and how this connection has permeated our universe from the start We cover several areas that include personal stories the micro and macro sources of world events the origins of our cosmos and solar system the emergence of human mindfulness and choice major episodes of the twentieth century the future and the quest for fairness In the course of examining these topics we identify how current scientific research is consistent with our speculation of how God influences our lives in the presence of all this randomness We conclude that the random events affecting us may originate in other dimensions that are inaccessible to us and that God is actively at work in the chaos and randomness that pervades our lives and our world
