**Faceted Search** Daniel Tunkelang, 2009-10-08 We live in an information age that requires us more than ever to represent access and use information Over the last several decades we have developed a modern science and technology for information retrieval relentlessly pursuing the vision of a memex that Vannevar Bush proposed in his seminal article As We May Think Faceted search plays a key role in this program Faceted search addresses weaknesses of conventional search approaches and has emerged as a foundation for interactive information retrieval User studies demonstrate that faceted search provides more effective information seeking support to users than best first search Indeed faceted search has become increasingly prevalent in online information access systems particularly for e commerce and site search In this lecture we explore the history theory and practice of faceted search Although we cannot hope to be exhaustive our aim is to provide sufficient depth and breadth to offer a useful resource to both researchers and practitioners Because faceted search is an area of interest to computer scientists information scientists interface designers and usability researchers we do not assume that the reader is a specialist in any of these fields Rather we offer a self contained treatment of the topic with an extensive bibliography for those who would like to pursue particular aspects in more depth Table of Contents I Key Concepts Introduction What Are Facets Information Retrieval Faceted Information Retrieval II Research and Practice Academic Research Commercial Applications III Practical Concerns Back End Concerns Front End Concerns Conclusion Glossary

**Analysis and Visualization of Citation Networks** Dangzhi Zhao, Andreas Strotmann, 2022-06-01 Citation analysis the exploration of reference patterns in the scholarly and scientific literature has long been applied in a number of social sciences to study research impact knowledge flows and knowledge networks It has important information science applications as well particularly in knowledge representation and in information retrieval Recent years have seen a burgeoning interest in citation analysis to help address research management or information service issues such as university rankings research evaluation or knowledge domain visualization This renewed and growing interest stems from significant improvements in the availability and accessibility of digital bibliographic data both citation and full text and of relevant computer technologies The former provides large amounts of data and the latter the necessary tools for researchers to conduct new types of large scale citation analysis even without special access to special data collections Exciting new developments are emerging this way in many aspects of citation analysis This book critically examines both theory and practical techniques of citation network analysis and visualization one of the two main types of citation analysis the other being evaluative citation analysis To set the context for its main theme the book begins with a discussion of the foundations of citation analysis in general including an overview of what can and what cannot be done with citation analysis Chapter 1 An in depth examination of the generally accepted steps and procedures for citation network analysis follows including the concepts and techniques that are associated with each step Chapter 2 Individual issues that are particularly important in

citation network analysis are then scrutinized namely field delineation and data sources for citation analysis Chapter 3 disambiguation of names and references Chapter 4 and visualization of citation networks Chapter 5 Sufficient technical detail is provided in each chapter so the book can serve as a practical how to guide to conducting citation network analysis and visualization studies While the discussion of most of the topics in this book applies to all types of citation analysis the structure of the text and the details of procedures examples and tools covered here are geared to citation network analysis rather than evaluative citation analysis This conscious choice was based on the authors observation that compared to evaluative citation analysis citation network analysis has not been covered nearly as well by dedicated books despite the fact that it has not been subject to nearly as much severe criticism and has been substantially enriched in recent years with new theory and techniques from research areas such as network science social network analysis or information visualization

Designing the Search Experience Tony Russell-Rose,Tyler Tate,2013-01-02 Search is not just a box and ten blue links Search is a journey an exploration where what we encounter along the way changes what we seek In this book the authors weave together the theories of information seeking with the practice of user interface design

Video Structure Meaning Brian C O'Connor,Richard L. Anderson,2022-05-31 For over a century motion pictures have entertained us occasionally educated us and even served a few specialized fields of study Now however with the precipitous drop in prices and increase in image quality motion pictures are as widespread as paperback books and postcards once were Yet theories and practices of analysis for particular genres and analytical stances definitions concepts and tools that span platforms have been wanting Therefore we developed a suite of tools to enable close structural analysis of the time varying signal set of a movie We take an information theoretic approach message is a signal set generated coded under various antecedents sent over some channel decoded under some other set of antecedents Cultural technical and personal antecedents might favor certain message making systems over others The same holds true at the recipient end yet the signal set remains the signal set In order to discover how movies work their structure and meaning we honed ways to provide pixel level analysis forms of clustering and precise descriptions of what parts of a signal influence viewer behavior We assert that analysis of the signal set across the evolution of film from Edison to Hollywood to Brakhage to cats on social media yields a common ontology with instantiations responses to changes in coding and decoding antecedents

Information Communication Ma Feicheng,2022-05-31 This book introduces fundamentals of information communication At first concepts and characteristics of information and information communication are summarized And then five classic models of information communication are introduced The mechanisms and fundamental laws of the information transmission process are also discussed In order to realize information

communication impediments in information communication process are identified and analyzed For the purpose of investigating implications of Internet information communication patterns and characteristics of information communication in the Internet and Web 2 0 environment are also analyzed In the end case studies are provided for readers to understand the theory

**Reassembling the Republic of Letters in the Digital Age** Howard Hotson, Thomas Wallnig, 2019 Between 1500 and 1800 the rapid evolution of postal communication allowed ordinary men and women to scatter letters across Europe like never before This exchange helped knit together what contemporaries called the *respublica litteraria* a knowledge based civil society crucial to that era s intellectual breakthroughs formative of many modern values and institutions and a potential cornerstone of a transnational level of European identity Ironically the exchange of letters which created this community also dispersed the documentation required to study it posing enormous difficulties for historians of the subject ever since To reassemble that scattered material and chart the history of that imagined community we need a revolution in digital communications Between 2014 and 2018 an EU networking grant assembled an interdisciplinary community of over 200 experts from 33 different countries and many different fields for four years of structured discussion The aim was to envisage transnational digital infrastructure for facilitating the radically multilateral collaboration needed to reassemble this scattered documentation and to support a new generation of scholarly work and public dissemination The framework emerging from those discussions potentially applicable also to other forms of intellectual cultural and economic exchange in other periods and regions is documented in this book
