*For an Architecture of Reality* Michael Benedikt, 1987 Michael Benedikt teaches practices architecture and writes in Austin where he is a Professor of Architecture at the University of Texas His second book *Deconstructing the Kimbell* 0 930829 16 6 is also published by Lumen Benedikt has written a bold theoretical essay with stirring cultural implications that argues to restore the missing sense of reality to architecture and insists on the direct esthetic experience of the real a timely manifesto Thought provoking and eminently quotable it succeeds admirably in what it sets out to do to recall architecture and not only architecture to those all but mute meanings so often passed over and yet inseparable from our everyday existence Karsten Harries This book will still be useful when this year's round arches have all been remodeled isn't it inevitable into pointed And because it is so vividly and thoughtfully written it will still be a pleasure to read Charles Moore Every literate architect should take an afternoon off to read and ponder this brief and thoughtful and thoroughly engaging book Benedikt says more about some central aesthetic and philosophical issues confronting contemporary architecture than many celebrated pundits manage to squeeze into a shelfful of books He offers a straightforward account of his own struggle to understand the pleasures and responsibilities of architecture in an age when aesthetic pleasure is all but indiscernible from entertainment and responsibility is often a cover for thoughtless conformity Roger Kimball *Architectural Record* Benedikt marches bravely into the philosophical thicket to find a working definition of reality In his sensibilities he is quite transcendental much like a Thoreau or an Emerson in a hotel lobby of potted ficus trees Howard Mansfield Small Press the book of the decade in Texas architectural circles *Texas Architect*
