Managing Culture and Interspace in Cross-border Investments Martina Fuchs, Sebastian Henn, Martin Franz, Ram Mudambi, 2017-06-27 This book focuses on the dialectics between spatio organisational gaps and local contexts that characterise cross border investments Interspatial investments be it mergers acquisitions M A or greenfield investments are usually characterised by what is referred to as otherness i e organisational and cultural distances of the firms involved in relation to their regional contexts At the same time economic political and socio cultural linkages are decisive for attracting cross border investments to regions and for providing firms with conditions supportive of their market success As a consequence of being locked into complex structures of proximities cross border investments are situated in contested terrain This terrain triggers learning processes in both regional actors and investors which can result in the convergence of mindsets and organisational issues This book is unique in that it combines interspace defined as the distance between the new owner and the cross border venture place the target region interpretation perception and understanding of the investment by the actors involved and context institutions actor networks and interaction thus offering better understanding of recent processes of globalisation Crossing disciplinary boundaries by integrating economic geography and management studies the volume adopts an innovative and spatially informed perspective on foreign direct investments FDI This perspective will be of great value to scholars students and practitioners The volume is inventive in its approach in that it offers fresh readings from interdisciplinary theoretical approaches and combines these with valuable empirical insights from developed as well as Emerging Economies

The Beijing Consensus? Weitseng Chen, 2017-04-27 Is there a distinctive Chinese model for law and economic development In The Beijing Consensus scholars turn their collective attention to answer this basic but seemingly under explored question as China rises higher in its global standing Advancing debates on alternative development programs with a particular focus on social and political contexts this book demonstrates that essentially no model exists Engaging in comparative studies the contributors create a new set of benchmarks to evaluate the conventional wisdom that the Beijing Consensus challenges and that of the Beijing Consensus itself Has China demonstrated that the best model is in fact no model at all Overall this title equips the reader with an understanding of the conclusions derived from China s experience in its legal and economic development in recent decades

Rationality and Legality of Non-market Economy Treatment in Antidumping Law Shao Long, 2024-01-03 This book serves as a comprehensive study of and provides rich insight into non market economy treatment including its past present and estimated future practices and implications It explores the introduction of the market and non market economy dichotomy into international trade law It traces the origin and development of non market economy treatment against changing international economic and political background The book examines this treatment in light of the rationale underlying anti dumping reflecting its alleged significance of ensuring fair trade It in particular investigates the varied non market economy treatment practices

responding concerns of China's rising as a large state led economy analyzing the deviation of NME treatment into an all in trade tool The book argues against preconceived bias and unilateral protectionism It highlights the universal existence of government involvement in the market and proposes objective assessment of its impact on fair trade Final proposition of the book is depoliticizing trade reforming comprehensively international trade rules to carefully calibrate different values including promoting fairness and enhancing global social welfare It envisages a multi dimension overhaul of international trade rules to rebalance trade interests rather than roughly labeling an economy to confer different treatment the practices of which lead to separation and chaos The book is of particular relevance and interest to economies in transition and among policy makers academicians and legal practitioners engaged in trade remedies and trade rules reconstruction

Socialist Economic Development in the 21st Century Alberto Gabriele, Elias Jabbour, 2022-03-02 Over a hundred years after the first socialist revolution broke the global monopoly of capitalism a new class of socialist oriented socioeconomic development is coming to the fore Capitalism is still dominant worldwide although its hegemony is no longer undisputed and humankind is now faced with a key existential challenge This book proposes an alternative path to overcoming the worldwide crisis of globalized capitalism It offers a novel balanced and historically rooted interpretation of the successes and failures of socialist economic construction throughout the last century The authors apply a multidisciplinary holistic and purpose based methodology to draw basic lessons from stylized facts emerging in different areas of knowledge ranging from political economy to biology and from key national socioeconomic experiences with a particular focus on China The book is divided into three parts The first is mainly theoretical and general in nature identifying the major contributions bequeathed by the hard sciences to their social counterparts Consistent with these findings the authors offer a stylized interpretation of the contemporary state of the art of the debate on the core concepts of economic science and advance a few elementary theories about what socialism in the 21st century could look like The second and third parts analyze and discuss the core features of a few select experiences which have evolved in certain countries since 1917 some of which are still unfolding The book will find an audience among academics researchers and students in the fields of economics political science history and geography as well as policy makers particularly in developing countries

Alliance Capitalism, Innovation and the Chinese State Victoria Higgins, 2015-09-15 This book analyses how key systems integration, technical pressures and the increasing use of collaborative alliances for market and product development are impacting on the socio-technical policy directives of Chinese State leaders and the strategic behaviour of key Chinese high technology firms operating in the global wireless sector. Foreign Exchange Risk Regulation Mr. Philipp

Hartmann, 1994-12-01 Capital adequacy regulations or quantity restrictions on bank portfolios put forward by the Basle Committee on Banking Supervision have virtually become an international standard of prudential regulation. Recent proposals aim at extending this approach to market risks, in particular to foreign exchange risk. The present paper provides a critical analysis of proposals to introduce foreign exchange position limits on a uniform cross-country basis, focusing on their effectiveness and their possible impact on the functioning of both mature and developing foreign exchange markets. Theoretical considerations are underpinned in the paper with descriptions of existing or proposed regulations in a broad range of both industrial and developing countries. Experiences with the use of foreign exchange position limits in developing countries provide insight into their widespread use for other than prudential purposes, in particular to support exchange rate and exchange control policies. **Constitution of Imperium** Ronnie D. Lipschutz, 2015-12-03 The title of this book is a play upon several important concepts and forces in the ongoing debate about American empire. Since September 11, 2001, the Bush administration and its counsels in the U.S. Department of Justice have been both constituting an empire of American hegemony and in so doing violating the spirit and the law of the American Constitution at home and abroad. The U.S. Constitution has been doing work in the nonsovereign spaces of Guantanamo Bay, Cuba, Abu Ghraib, Baghdad, and CIA black detention sites around the world. The reach of this constitution is becoming visible in National Security Agency surveillance and data mining of electronic communications between the United States and the rest of the world and in a myriad of other regulatory and legal demands made by the United States both of its citizens and of those living in and traveling among other countries. And in testing the limits of its wished-for powers, the Bush administration seeks to constitute an imperium that by its own definition would be nowhere subject to the long assumed checks of either the U.S. Constitution, Congress, the courts, or international law, for it operates outside of the boundaries of American sovereignty in defiance of the international community and the United Nations and in violation of the law of nations. This book is the latest and perhaps sharpest entry in the burgeoning literature of American empire since Hardt and Negri. Its focus on the legal and institutional aspects of empire sets it apart from the literature on this subject.
