D. Walker, D. Christopher Brooks, Kem Saichaie, Christina I. Petersen, 2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning they present many new challenges to faculty because among other things they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed The importance of learning how to use these classrooms well and to capitalize on their special features is paramount The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls This book provides an introduction to ALCs briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively Among the questions this book addresses are How can instructors mitigate the apparent lack of a central focal point in the space What types of learning activities work well in the ALCs and take advantage of the affordances of the room How can teachers address familiar classroom management challenges in these unfamiliar spaces If assessment and rapid feedback are critical in active learning how do they work in a room filled with circular tables and no central focus point How do instructors balance group learning with the needs of the larger class How can students be held accountable when many will necessarily have their backs facing the instructor How can instructors evaluate the effectiveness of their teaching in these spaces This book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create ALCs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces South Korean Education and Learning Excellence as a Hallyu Young Chun Kim, Jae-seong Jo, Jung-Hoon Jung, 2023-08-11 This book constitutes a sociological anthropological and curricular inquiry into the factors surrounding high academic achievement rates of students in South Korea Taking root in similar studies conducted around the exemplary nature of the Finnish education model it explores the phenomenon of success in South Korea uniquely connecting it to the scholarship and models for examining the recent shift in attention and popularity of Korean culture The authors argue that Korean education or K edu can also be studied and understood as a Hallyu and an exemplary form of education Drawing on longitudinal qualitative studies spanning over 15 years the authors advance understandings of Korean academic success beyond more generalized understandings of how Asian students learn and towards a holistic explanation for the case of Korea As such the book challenges the perception of Korean students as passive learners with a controlled learning culture and instead advocates the ways in which Korean students are leading a changing culture by utilizing all available resources and opportunities in the space of South Korea's

evolving ecological system of education In addition this book provides one explanation as to how students from East Asian countries achieve such excellent academic performance A crucial exploration of the culture and growth of education systems in Asian countries this book will appeal to scholars and researchers with interests in Korean education and Korean students academic achievement as an emerging inquiry for both Korean studies and East Asian Cultural Studies In addition this book will also be informative for scholars of comparative education sociology of education educational policy and postcolonial educational research in the world Resources in Education ,1994-07 **Quarterly Review of Distance Education**
