Enchanted Objects:

Enchanted Objects Allan Hepburn, 2010-01-01 Enchanted Objects investigates the relationship between visual art and contemporary fiction addressing the problems that arise when paintings, books, porcelains or statues are represented in contemporary novels. The distinction between objects and art objects depends on aesthetics. While some objects are authenticated through museum exhibits, others are hidden, broken, neglected, coveted, hoarded or salvaged. Allan Hepburn asks four broad questions about aesthetics and value: What is a detail in visual art? Is all art ornamental? Does the value of an object increase because it is fragile? What defines ugliness? Contemporary novels such as Tracy Chevalier's *Girl with a Pearl Earring*, Barry Unsworth's *Stone Virgin* and Bruce Chatwin's *Utz* offer implicit answers to these questions while critiquing museums and the determination to invest objects with value through display. Addressing current debates in museum studies, cultural studies, art history and literary criticism, *Enchanted Objects* develops an extensive theory of how contemporary literature engages with and relates to aesthetic objects.

Enchanted Objects David Rose, 2015-04-28 We are now standing at the precipice of the next transformative development: the Internet of Things. Soon, connected technology will be embedded in hundreds of everyday objects we already use: our cars, wallets, watches, umbrellas, even our trash cans. These objects will respond to our needs, come to know us and learn to think on our behalf. David Rose calls these devices, which are just beginning to creep into the marketplace, *Enchanted Objects*. Some believe the future will look like more of the same: more smartphones, tablets, screens embedded in every conceivable surface. Rose has a different vision: technology that atomizes, combining itself with the objects that make up the very fabric of daily living. Such technology will be woven into the background of our environment, enhancing human relationships and channeling desires for omniscience, long life and creative expression. The enchanted objects of fairy tales and science fiction will enter real life. Groundbreaking, timely and provocative, *Enchanted Objects* is a blueprint for a better future where efficient solutions come hand in hand with technology that delights our senses.

Enchanted Objects David Rose, 2014-07-15 In the tradition of *Who Owns the Future*, an MIT Media Lab scientist imagines how everyday objects can intuit our needs, improve our lives and form an ethereal interconnection of gadgets and human desires that will pervade our lives in the very near future. *The Wall Street Journal*: We are now standing at the precipice of the next transformative development: a world in which technology becomes more human. Soon, connected technology will be embedded in hundreds of everyday objects we already use: our cars, wallets, watches, umbrellas, even our trash cans. These objects will respond to our needs, come to know us and even learn to think ahead on our behalf. David Rose calls these devices, which are just beginning to creep into the marketplace, *Enchanted Objects*. In Rose's vision of the future, technology atomizes, combining itself with the objects that make up the very fabric of daily living.
