Enchanting Beyond Disenchantment Global Academic Publishing Book:

Enchanting Stephen David Ross, 2012-08-01 Explores how we might think and live in the enchantment of the secular modern world

Subjects and Simulations Anne O'Byrne, Hugh J. Silverman, 2014-11-05 Subjects and Simulations presents essays focused on suffering and sublimity representation and subjectivity and the relation of truth and appearance in the twenty first century Inspired by the work of Jean Baudrillard Philippe Lacoue Labarthe and JeanLuc Nancy sixteen authors study how the real reasserts itself in an age of every more fragmented media and how art and literature give us access to forms of truth that elude philosophy How does representation grant us access to the place once occupied by the subject Is political life possible Can plural thinking be retrieved Will metaphor and simulation give us ways of being in an evanescent world The volume engages discussions of French and Continental philosophy post structuralism deconstruction simulacra aesthetics existentialism and media theory

Subtle Agroecologies Julia Wright, 2021-06-29 This book is about the invisible or subtle nature of food and farming and also about the nature of existence Everything that we know and do not know about the physical world has a subtle counterpart which has been scarcely considered in modernist farming practice and research If you think this book isn't for you if it appears more important to attend to the pressing physical challenges the world is facing before having the luxury of turning to such subtleties then think again For it could be precisely this worldview the one prioritises the physical material dimension of reality that helped get us into this situation in the first place Perhaps we need a different worldview to get us out This book makes a foundational contribution to the discipline of Subtle Agroecologies a nexus of indigenous epistemologies multidisciplinary advances in wave based and ethereal studies and the science of sustainable agriculture Not a farming system in itself Subtle Agroecologies superimposes a non material dimension upon existing materially based agroecological farming systems Bringing together 43 authors from 12 countries and five continents from the natural and social sciences as well as the arts and humanities this multi contributed book introduces the discipline explaining its relevance and potential contribution to the field of Agroecology Research into Subtle Agroecologies may be described as the systematic study of the nature of the invisible world as it relates to the practice of agriculture and to do this through adapting and innovating with research methods in particular with those of a more embodied nature with the overall purpose of bringing and maintaining balance and harmony Such research is an open minded inquiry its grounding being the lived experiences of humans working on and with the land over several thousand years to the present By reclaiming and reinterpreting the perennial relationship between humans and nature the implications would revolutionise agriculture heralding a new wave of more sustainable farming techniques changing our whole relationship with nature to one of real collaboration rather than control and ultimately transforming ourselves
