There are animations and videos throughout the course which makes the material more interesting. Technical words are also pronounced for the student. There are hands-on experiments throughout the CD-ROM so that the student can have a laboratory-based biology course. You can purchase a kit of materials so that these experiments can be done either at home or in a school setting. There are study guides and tests for every module in the course, and the answers are provided on a separate CD that is included with the course.
