Exploring Science and Mathematics in a Child's World Genevieve A. Davis, J. David Keller, 2009

How do young children learn math and science? Exploring Science and Mathematics in a Child's World examines the development of learning theory through twelve concept explorations on basic natural science themes. The book models how best learning practices are constructed in classroom settings. It also demonstrates how to apply mathematical concepts in authentic minds-on and hands-on experiences related to science. Part One lays the foundation of child development, interrelated mathematics and science processes, and Concept Exploration design. Concept Exploration provides an alternative approach to the usual reliance on a basic model, enabling the teacher and students to explore a wider range of design concepts. This is outlined in Chapter Six. Part Two contains chapters of activities based around a theme such as water, clouds, sun, and shadows, wind, birds, insects, and more. All of the activities correlate to the NSES and NCTM standards. This is pictured in a chart at the beginning of each activity chapter for easy reference. For schools where blended math and science courses are offered, this book fills a need as one that demonstrates appropriate content integration and will be a great reference for teachers for many years.

Teaching Young Children Mathematics Janice Minetola, Robert Ziegenfuss, J. Kent Chrisman, 2013-09-11

Teaching Young Children Mathematics provides a comprehensive overview of mathematics instruction in the early childhood classroom. Taking into account family differences, language barriers, and the presence of special needs students in many classrooms throughout the U.S., this textbook situates best practices for mathematics instruction within the larger frameworks of federal and state standards, as well as contemporary understandings of child development. Key topics covered include developmental information of conceptual understanding in mathematics from birth through 3rd grade, use of national and state standards in math, including the new Common Core State Standards, information for adapting ideas to meet special needs, and English Language Learners literacy connections in each chapter, real-world connections to the content, and information for family connections to the content.

A Sense of Wonder Jenny Aitken, Jan Hunt, Elizabeth Roy, Bess Sajfar, Sally Featherstone, 2015-09-24

This practical book offers a scientific framework for the early years that is divided into four key areas: biological science, physical science, earth science, and environmental science. Topics covered include life, nature, environmental care, sustainability, and biodiversity, with links throughout to the EYFS. A Sense of Wonder is an easy-to-read guide for educators looking to implement play-based science learning and inspire children of all ages in the Early Years.
