Teaching Human Rights in Primary Schools Alison E. C. Struthers, 2019-11-07 Teaching Human Rights in Primary Schools delves into the important issue of Human Rights Education HRE implementation exploring the nature and extent of HRE in education policy and practice in English primary schooling and seeking to understand the reasons for deficiencies in practice in this area HRE enables people not only to identify rights violations in their own lives but also equips them with the knowledge values and skills required to accept defend and promote human rights more broadly An awareness of human rights is therefore crucial no matter what a person's age and as such it is vital that information about human rights is included within formal education Beginning with an overview of the relevant international obligations and agreements related to HRE Struthers then demonstrates that these are ostensibly not currently being met in either policy or practice in England The book then draws upon current literature and empirical research with teachers to explore and analyse the barriers to HRE implementation While the book uses the specific context of English primary education it makes broad interdisciplinary recommendations concerning how the provision of HRE could be improved which will be relevant to other countries instituting programmes of HRE or values and citizenship education Interdisciplinary in nature and addressing HRE at both the international and domestic levels this book will be of great interest to scholars researchers and postgraduate students in both education and law It will be of particular interest to those engaged in the study of human rights children's rights and education law as well as those interested in curriculum policy and development teaching methodologies and the sociology of education It should also be essential reading for teacher educators teachers and policymakers

Understanding Early Years Inequality Alice Bradbury, 2013-09-02 Understanding Early Years Inequality uses critical sociological perspectives to examine the impact of changing assessment policy on primary school classrooms with a particular focus on issues of inequality Drawing on accounts of life in early years classrooms Alice Bradbury suggests that a specific model of the good learner operates and that this model works to exclude some groups of students from positions of educational success Key themes examined throughout this book relate to The relationship between assessment policy and children's identities as learners The complexity of classroom life The power of assessment to shape definitions of learning and learners The impact of discourses of class race religion and the inner city on how children are assessed and how assumptions about inner city schools and low attainment can put pressure on teachers to assess children in particular ways In this important text the author argues that assessment policies can have a huge impact on classrooms and teachers as well as having potentially damaging effects for young children particularly those from minoritised and economically disadvantaged backgrounds The book explores in detail the complex interaction of education policies with discourses of attainment and expectation and the resulting reproduction of patterns of inequality Understanding Early Years Inequality will have an immediate impact on current debates about educational policy and practice in Early Years education and will be of

particular interest to academics and students in educational studies sociology of education and early childhood studies

**Mathematics and Transition to School** Bob Perry, Amy MacDonald, Ann Gervasoni, 2015-01-09 This edited book brings together for the first time an international collection of work focused on two important aspects of any young child's life: learning mathematics and starting primary or elementary school. The chapters take a variety of perspectives and integrate these two components in sometimes explicit and sometimes more subtle ways. The key issues and themes explored in this book are the mathematical and other strengths that all participants in the transition to school bring to this period of a child's life; the opportunities provided by transition to school for young children's mathematics learning; the importance of partnerships among adults and among adults and children for effective school transitions; and mathematics learning and teaching; the critical impact of expectations on their mathematics learning as children start school; the importance of providing children with meaningful challenging and relevant mathematical experiences throughout transition to school; the entitlement of children and educators to experience assessment and instructional pedagogies that match the strengths of the learners and the teachers; the importance for the aspirations of children, families, communities, educators, and educational organisations to be recognised as legitimate; and key determinants of actions, experiences, and successes in both transition to school and mathematics learning; and the belief that young children are powerful mathematics learners who can demonstrate this power as they start school. In each chapter, authors reflect on their work in the area of mathematics and transition to school, place that work within the overall context of research in these fields, predict the trajectory of this work in the future, and consider the implications of the work both theoretically and practically.

**The Psychology of Starting School** Claire Hughes, Caoimhe Dempsey, Elian Fink, 2024-08-13 The Psychology of Starting School offers a highly accessible practical guide to cutting-edge research from developmental science to guide parents and professionals through this exciting but sometimes tricky period. Written by expert developmental psychologists, it explores how social and emotional competence emerges within a network of supportive relationships and explains how the transition to school compares with other key transitions for children, for example, becoming a sibling. Addressing the all-important topic of children's early friendships, it explains how children's mindreading skills and ability to regulate their feelings and behaviour contribute to a successful school transition. The book offers guidance on topics such as successful home-school links, the impact of starting school on family life, and troubleshooting problems for both parents and educators, including socialising outside school, children's fatigue, and establishing positive relationships with other parents at the school gates. Designed to dip in and out and complete with numerous examples, chapter summaries, and top tips for parents and teachers, this book is essential reading for parents, Early Years professionals,
