Dynamic General Equilibrium Modelling Burkhard Heer, Alfred Maussner, 2005-12-05 Modern business cycle theory and growth theory uses stochastic dynamic general equilibrium models Many mathematical tools are needed to solve these models The book presents various methods for computing the dynamics of general equilibrium models In part I the representative agent stochastic growth model is solved with the help of value function iteration linear and linear quadratic approximation methods parameterised expectations and projection methods In order to apply these methods fundamentals from numerical analysis are reviewed in detail Part II discusses methods for solving heterogeneous agent economies In such economies the distribution of the individual state variables is endogenous This part of the book also serves as an introduction to the modern theory of distribution economics Applications include the dynamics of the income distribution over the business cycle or the overlapping generations model Through an accompanying home page to this book computer codes to all applications can be downloaded

Spear, Warren Young, 2023-09-04 The 800 pound gorilla in the room of macroeconomics is the question of why the overlapping generations model didn't become the central workhorse model for macroeconomics as opposed to the neoclassical growth model The authors here explore the co evolution of the two models **Public Economics** Burkhard Heer, 2019-02-08 Today the most pressing challenges for public economics are of macroeconomic nature pensions debt income distribution and fiscal sustainability All these problems are compounded by the phenomenon of demographic transition and aging This graduate textbook addresses these issues with the help of state of the art macroeconomic tools that are based on a sound microfoundation and rooted in empirical evidence Different from the standard partial equilibrium analysis in traditional textbooks on public economics the concept of general equilibrium helps to account for compensating or amplifying side effects of economic policy GAUSS and MATLAB computer code as well as teaching material slides are available as downloads from the author's homepage *Dictionary of Ecological Economics* Brent M. Judd, 1997 This essay examines the idea and potential of a computational approach to theory discusses methodological issues raised by such computational methods and outlines the problems

associated with the dissemination of computational methods and the exposition of computational results We argue that the study of a theory need not be confined to proving theorems that current and future computer technologies create new possibilities for theoretical analysis and that by resolving these issues we can create an intellectual atmosphere in which computational methods will make substantial contributions to economic analysis     Introductory Econometrics with Applications Ramu Ramanathan,1995 Offers an ideal combination of econometric theory and hands on practical training for undergraduate and graduate courses The authors ambition is to provide realistic applications without sacrificing theoretical underpinnings He uses a logical step by step approach to walk readers through numerous real world examples of model specification estimation and hypothesis testing The book also succeeds at being self contained By including background information on mathematics probability statistics and software applications readers have all the information they need in one place     IMACS '91 Robert Vichnevetsky,John James Henry Miller,1991     JOURNAL OF ECONOMICS LITERATURE ,1996

*Dynamic Modelling and Control of National Economies, 1989* Nicos M. Christodoulakis,1990 The Symposium aimed at analysing and solving the various problems of representation and analysis of decision making in economic systems starting from the level of the individual firm and ending up with the complexities of international policy coordination The papers are grouped into subject areas such as game theory control methods international policy coordination and the applications of artificial intelligence and experts systems as a framework in economic modelling and control The Symposium therefore provides a wide range of important information for those involved or interested in the planning of company and national economics     **The British National Bibliography** Arthur James Wells,2009     Journal of Mathematical Economics ,1984
