**Dynamic Analysis of Structures for Looms Industry** Jigar Sevalia, Yogesh Rathod, Sunil Kukadiya, Sarthi Bhavsar, 2014-09-26 Bachelor Thesis from the year 2013 in the subject Engineering Civil Engineering grade AA Gujarat University Gujarat Technological University course Final Year Project language English abstract Ever since the existence of mankind it has noticed a remarkable advancement in field of science and technology Traditional hand weaving methods have been replaced by modern and speedy looms machine With faster production rate these machines proved to be a boon for textile manufacturers However they come with an unnoticed problem of vibration Hence there arises a need to study the effects of vibrations on the structural as well as non structural components of the building Here in this project an attempt has been made to study the dynamic behavior of a structure for looms industry subjected to vibration due to operations of looms machine by changing its various parameters With an increase in demand of textile more and more looms machines are being installed every day While designing the structure to house these looms it becomes incumbent upon the designer to curtail the amplitude of vibrations within the permissible limits One must also make sure that the frequency of structure is separated for operating frequency of machine by a good margin so that the Resonance Condition can be avoided The looms machine fall under the category of reciprocating machine and have medium operating speed ranging from 100 rpm to 180 rpm The main source of vibration is the Beating Up motion This generates a Harmonic Load due to the unbalanced force caused by the reciprocating sley movement Hence the designing of structure for looms industry is a complex process which needs prime considerations The cost of dynamic analysis of these structure is paramount hence a small fraction of amount is being spent might lead to inadequately constructed structures which may result in failure and shut downs exceeding many times the cost of the capital investment required for properly designed and built structure Now in such a case by executing parametric study one can decide which parameter out of many is most sensitive to odd results so that by varying those parameters only results can be brought to the required level and do not affect other reliable results An attempt is made in the thesis to carry out a parametric study by using software STAAD Pro Following Parameters are studied in this thesis 1 Sizes of Column 2 Sizes of Beams 3 Story Height 4 Number of Stories Effect of remedial measures like 1 Cross Bracing below Plinth Level 2 Full Length Jacketing of Columns 3 Partial Length Jacketing of Columns 4 Cross Tie Beams 5 Haunches at the Junction

**Decision Loom** Vincent Barabba, 2011-11-30 Decision making has been one of the principal victims of modern thinking The analytical approach has of course brought us vaccines electricity and the internal combustion engine But in seeking to break things down into their component parts and improve the parts governments and businesses continue to make some astonishingly bad decisions What s more many enterprises still pay close attention to decisions and decision making whilst overlooking the bigger picture the organizational system within which those decisions get made This elegant book is a guide for any public private government or non profit organization that needs a system for making better decisions It sets out to

change our analytical habit and invites enterprises to consider the bigger picture Author Vince Barabba presents an elegantly simple approach to making better decisions He calls this approach The Decision Loom and bases it on Systems Thinking Design Thinking and Complexity Theory He also describes the four core capabilities that any organization must put in place for this approach to work What s more because we re humans and prefer stories to instruction manuals the tapestry of the book is embroidered with fascinating examples from the author s lifetime of experience at the head of American corporate and public decision making *Structure and Effectiveness of the Accumulation Fund of the USSR*.
