Society and the Environment Michael S Carolan, 2020-03-10 Without focusing entirely on what is wrong with the world around us the third edition of Society and the Environment centers its discussion on realistic solutions to the problems that persist and examines current controversies within a socio organizational context After introducing pragmatic environmentalism Carolan discusses the complex pressures and variables that exist where ecology and society collide such as population growth and the concurrent increase in demands for food and energy and transportation and its outsized influence on urban and community patterns With further attention given to the social phenomena and structural dynamics driving today's environmental problems the book concludes with an important reflection on truly sustainable solutions and what constitutes meaningful social change Each chapter in this interdisciplinary text follows a three part structure beginning with an overview of what is wrong and why This leads into a

discussion on each issue's wide ranging implications and finally a balanced consideration of realistic solutions Featuring updated and expanded examples discussion points and coverage of recent developments including the US withdrawing from the Paris Agreement booming national economies and wealth distribution growing global interest in environmental justice with particular focus on the links between injustice and race and inequality climate change and renewable energy this new edition remains an essential companion for courses on environmental sociology and sustainability

Sex and Gender L. Zachary DuBois, Anelis Kaiser Trujillo, Margaret M. McCarthy, 2025-05-16 This open access book provides an interdisciplinary perspective on the study of sex and gender and suggests directions for future research in multiple fields Sex and gender are understood measured and applied in different ways across society and science To foster interdisciplinary dialogue and to promote informed applications in research policy medicine and public health the Ernst Strüngmann Forum convened scholars from diverse fields to examine a widely held assumption that sex and gender are conceptually separate Synthesizing the interdisciplinary perspectives that emerged from this discourse this volume explores the entanglement of sex and gender suggesting that they are co constituted in ways that have not been fully understood This entanglement is examined from multiple perspectives research challenges are explored and ways to move forward are proposed to advance basic and developmental systems biology human biomedical and clinical research as well as policy and practice The book should be of interest to policymakers as well as researchers working in anthropology behavioral neuroendocrinology cellular and molecular neuroscience clinical psychology epidemiology and feminist gender and transgender studies

Food Diversity Between Rights, Duties and Autonomies Alessandro Isoni, Michele Troisi, Maurizia Pierri, 2018-04-25 The book reflects on the issues concerning on the one hand the difficulty in feeding an ever increasing world population and on the other hand the need to build new productive systems able to protect the planet from overexploitation The concept of food diversity is a synthesis of diversities biodiversity of ecological sources of food supply socio territorial diversity and cultural diversity of food traditions In keeping with this transdisciplinary perspective the book collects a large number of contributions that examine firstly the relationships between agrobiodiversity rural sustainable systems and food diversity and secondly the issues concerning typicality food specialties food identities rural development and territorial communities Lastly it explores legal questions concerning the regulations aiming to protect both the food diversity and the right to food in the light of the political economic and social implications related to the problem of feeding the world population while at the same time respecting local communities rights especially in the developing countries The book collects the works of legal scholars agroecologists historians and sociologists from around the globe

The Real Cost of Cheap Food Michael Carolan, 2018-02-06 This thought provoking but accessible book critically examines the dominant food regime on its own terms by seriously asking whether we can afford cheap food and by exploring what exactly cheap food affords us Detailing the numerous ways that our understanding of food has narrowed such as its price per ounce combination of nutrients yield

per acre or calories the book argues for a more contextual view of food when debating its affordability The first edition published in 2011 was widely praised for its innovative approach and readability In this new edition the author brings all data and citations fully up to date Increased coverage is given to many topics including climate change aquaculture financialization BRICS countries food based social movements gender and ethnic issues critical public health and land succession There is also greater discussion about successful cases of social change throughout all chapters by including new text boxes that emphasize these more positive messages The author shows why today s global food system produces just the opposite of what it promises The food produced under this regime is in fact exceedingly expensive Many of these costs will be paid for in other ways or by future generations and cheap food today may mean expensive food tomorrow By systematically assessing these costs the book delves into issues related but not limited to international development national security healthcare industrial meat production organic farming corporate responsibility government subsidies food aid and global commodity markets It is shown that exploding the myth of cheap food requires we have at our disposal a host of practices and policies

Caring for Patients from Different Cultures E. J. Sobo, Geri-Ann Galanti, 2026-11-17 Abstracts of the Annual Meeting -- American Anthropological Association American Anthropological Association, 1995

Race and Human Diversity Robert L. Anemone, 2015-09-04 This book lays out some of the basic problems of a biological theory of race in particular the arbitrariness of most racial classifications based on biological differences between populations It provides the biological background to a consideration of the biology of human differences

Race and Human Diversity Robert L. Anemone, 2019-02-18 Race and Human Diversity is an introduction to the study of human diversity in both its biological and cultural dimensions Robert L Anemone examines the biological basis of human difference and how humans have biologically and culturally adapted to life in different environments The book discusses the history of the race concept evolutionary theory human genetics and the connections between racial classifications and racism It invites students to question the existence of race as biology but to recognize race as a social construction with significant implications for the lived experience of individuals and populations This second edition has been thoroughly revised with new material on human genetic diversity developmental plasticity and epigenetics There is additional coverage of the history of eugenics race in US history citizenship and migration affirmative action and white privilege and the burden of race Fully accessible for undergraduate students with no prior knowledge of genetics or statistics this is a key text for any student taking an introductory class on race or human diversity Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Paperbound Books in Print, 1992 **Choice**, 2005 Human Evolution and Biocultural Diversity Jenna Olivia Parker Adams, 1999

ON BIOCULTURAL DIVERSITY MAFFI LUISA, 2001-04-17 Biodiversity loss is a well known phenomenon Over the next thirty years according to most projections 20 percent of the world s species may cease to exist

Less widely known though attracting increasing attention is the diversity loss that is affecting the world's languages and cultures. Up to 11 percent of an estimated 6 000 spoken languages in the world today are nearly extinct and as many as 90 percent of those languages may vanish during the course of this century. *On Biocultural Diversity* brings together an interdisciplinary group of scholars from the social and natural sciences as well as cultural advocates, human rights specialists and indigenous experts to discuss the ways in which the losses of biological, linguistic and cultural diversity are linked. Combining research with advocacy, this book outlines the threats to the world's diversity, explores the connections among its various forms and recommends measures to help preserve and perpetuate the variety of life on Earth. Presenting case studies from Africa, Asia, Oceania and the Americas, the contributors show how the loss of linguistic and cultural diversity often involving indigenous peoples' removal from their lands, suppression of their languages and the loss of traditional environmental knowledge based on subsistence practices can affect biodiversity. The final chapters suggest new directions for research, documentation, training and action in order to conserve biocultural diversity. This collection reveals a broad picture of why diversity matters. It offers a common foundation and practical avenues for preserving the wealth of biological life as well as the cultural riches represented by indigenous and minority languages and the knowledge they embody.

Dynamics of Human Diversity N. J. Enfield, 2011 **Biocultural Diversity in Europe** Mauro Agnoletti, Francesca Emanuelli, 2016-03-09. The book collects a selection of the papers presented at the meeting held in the context of the Joint Programme on the Links between Biological and Cultural Diversity (JP BiCuD). Recognizing the inextricable link between biological and cultural diversity, the United Nations Educational Scientific and Cultural Organization (UNESCO) and the Secretariat of the Convention on Biological Diversity (CBD) joined forces and in 2010 launched the Joint Programme on the Links between Biological and Cultural Diversity (JP BiCuD). The first meeting for the implementation of the JP BiCuD was held in Florence, Italy, in April 2014 and produced the UNESCO CBD Florence Declaration, which highlights the concept of biocultural diversity. The European rural territory is predominantly a biocultural, multi-functional landscape providing a crucial and effective space for integration of biological and cultural diversity, suggesting the need to revise some of the current strategies for the assessment and management of biodiversity.
