Teaching Language and Literacy James F. Christie,Billie Enz,Carol Vukelich,2003 The unique focus of this text integrates constructivist learning diversity and instruction based assessment and helps translate principles into practice The central underlying thesis of Teaching Language and Literacy is that children are at the center of all good language and literacy teaching The text with broad coverage of preschool through the elementary grades advocates an appreciation of student diversity and an implementation of assessment strategies relating to specific learning teaching events The text describes how children construct their own knowledge about oral and written language by engaging in integrated meaningful and functional activities with other people in a variety of contexts It then goes one step further describing how teachers can design authentic classroom reasons for using oral and written language In keeping with the text s theme illustrations of how teachers can work effectively with diverse learners appear throughout the text In addition instructionally linked assessment is another important topic central to the text **American Book Publishing Record** ,2007 A Child Centred EYFS

Sustainable Practices for a Resilient Future Terri-Ann Berry, Leopoldo Mendoza-Espinosa, Jo Burgess, Ferdinand Oswald, 2025-06-17

United Nations Sustainable Development Goals (SDGs) serve as a blueprint to address the world's most pressing challenges such as poverty, inequality, climate change, and biodiversity loss. Research plays a pivotal role in understanding these complex issues, providing evidence-based insights to guide policy formulation, program development, and implementation strategies. Smart sustainable development refers to an innovative, forward-thinking and/or technologically advanced approach that combines innovative solutions with sustainable practices to promote long-term environmental, social, and economic well-being. This Research Topic has been created in collaboration with an international event comprising online and face-to-face opportunities to highlight practical solutions to sustainability in line with the United Nations SDGs. This presents a unique opportunity for a wide range of sustainable practitioners from academia, industry, and communities to present research works and projects with an innovation focus, enabling international networking and knowledge sharing to support a more sustainable and inclusive future. This Research Topic seeks to investigate both complete or ongoing projects introducing innovative solutions that are strongly aligned with the UN SDGs and have led to tangible outcomes with remarkable impact and benefit to sustainable development. The key aspects contributing to smart sustainable development include technological integration, environmental stewardship, social equity, economic prosperity, resilient communities, and infrastructure and collaboration and governance. We welcome contribution from individual researchers, academic groups, and partnerships between academics and professionals. Research focused on using innovation to bridge the gap between global aspirations and local realities, taking into account diverse cultural, social, economic, and environmental contexts, is particularly welcome. Topics can cover but are not limited to the following themes: Smart technologies to further sustainable development including in built environment, biotechnologies, energy systems, health care, education, transportations, and emergency and disaster risk management; Sustainable infrastructure including policies, creative design, and the implementation of new methods, materials, and approaches to the planning, construction, and use of sustainable buildings, water, and wastewater management, stormwater design, and solid waste management; Digitalization and intelligence for the uptake of sustainable solutions including through smart energy systems, mobility, digital transformation, and disruption; Resilience and disaster management and the growth of digital cities; Community and healthcare solutions to benefit gender equality, community development, indigenous peoples, and the preservation of local, regional, and national cultural heritage in new ways; Nature resource protection and management approaches including environmental conservation, water-sensitive design, coastal erosion systems, solutions, and adaptation to climate change; Sustainable agricultural initiatives to increase the uptake and use of new approaches and methods including ones which incorporate creative solutions to supporting natural ecosystems.
