Urban Planning, Management and Governance in Emerging Economies Jan Franssen, Meine P. van Dijk, Jurian Edelenbos, 2021-06-25 Exploring how urban professionals plan manage and govern cities in emerging economies this insightful book studies the actions and instruments they employ It highlights how the paradigms of interventions and approaches to urban management are shifting indicating that urban governance is becoming increasingly important in dealing with wicked issues like climate change and social and economic inequalities in cities

Eco-Cities and the Transition to Low Carbon Economies Federico Caprotti, 2014-12-02 The author examines the two most advanced eco city projects the Sino Singapore Tianjin Eco City in China and Masdar City in Abu Dhabi These are the most notable attempts at building new eco cities to both face up to the crises of the modern world and to use the city as an engine for transition to a low carbon economy

Population Mobility, Urban Planning and Management in China Tai-Chee Wong, Sun Sheng Han, Hongmei Zhang, 2015-03-24 This volume contains essays that examine contemporary urban and regional planning and development in China Through in depth theoretical and empirical analysis it provides insights into the urban policies and operational mechanisms of this colossal transitional economy which has presented unprecedented challenges and dynamics

Inside readers will discover the causes and consequences of rapid urbanization that have led to a series of environmental economic and social planning and management measures designed to achieve quality urban living The essays also detail efforts in adopting the latest options in city building such as specific urban planning approaches in developing large city regions building cities without slums constructing new townships and green urbanism including eco city and sustainable transport In addition coverage explores financial management and support as a means to encourage urbanization and urban economic growth in less developed regions Overall the volume offers a wealth of concrete detailed information on conditions in different regions of China and features an extensive range of content methods and theory It provides readers with a comprehensive portrait of the chain relationship between rapid urbanization spatial planning and management throughout the country The book will serve as a useful reference for national and international consultancy services doing business or serving public interest in China It will also be of interest to an international audience seeking a better understanding of urban development and planning in China including university teachers students government agencies and general readers

Sustainability and the City Lauren Curtright, Doris Bremm, 2017-07-28 Sustainability and the City Urban Poetics and Politics contributes to third generation discourse on sustainable development by considering through a humanistic lens theories and practices of sustainability in a wide range of urban cultures It demonstrates cities inextricability from discussions on sustainability because not only is the world urbanizing at an unprecedented rate but also cities are primary locations of the circulation of excess capital socioeconomic divisions and hierarchies political resistance friction between human and non human worlds and the confluence of art policy and identity formation in placemaking With essays by scholars working in a variety of fields from architecture to literature to music to sociology this collection maintains that any hope for achieving urban sustainability will require taking seriously the ways in which cities are imagined Efforts to make cities sustainable must fully incorporate the humanities because critical endeavors and creative expressions that fall within the purview of the humanities are vital to closing the conceptual gulf as well as the practical gap between human and non human conservation Even if the environmental humanities embrace cities critics must ask whether coalescing the terms sustainability and city may actually obstruct human action to combat climate change which from some angles seems impending self imposed apocalypse To examine the urban turn Sustainability and the City attends to culture Essays in the first part of the collection approach urban sustainability from various disciplinary vantage points to emphasize history ideology pedagogy and critical theory The second part of the collection analyzes urban commons on four different continents Finally the collection moves from a diverse set of interpretations of on the ground urban phenomena to a compilation of readings of sustainability in different media and genres sound art drama fiction and film set in or evocative of cities The collection carves out a place for artists and critics to help realize social justice in cities which generate remarkable power but power that is too often and too easily used destructively unfairly and wastefully despite cities unique capacities to inspire and

sustain humanity **Sustainable Urbanism in China** Ali Cheshmehzangi, Ayotunde Dawodu, Ayyoob Sharifi, 2021-08-16
 Sustainable Urbanism in China explores the notion of Sustainable Urbanism by considering the role sustainable neighborhood planning plays in the larger picture of sustainable urbanism and suggests innovations and best practices that are either developed or adopted by China. These are narrated as lessons learnt for other countries where we see similar trends of development patterns or emerging practices. Through various explorations of challenges, paradigms and innovations of urban sustainability, this book highlights how planning policy and design are forming and reforming in the context of China. These are offered through a set of guidelines and pathways for urban sustainability at the scale of neighborhoods, communities or districts in a wider context of urban environments as well as strategies for planners, developers, policy makers and educators in the field of the built environment. Through a comprehensive overview of urban sustainability practices in China, this book investigates 12 case study projects. These comprehensive explorations should in turn help construct the future directions of China's sustainable urban development and provide innovative pathways of sustainable urbanism in China and around the globe.

Enabling Eco-Cities Dominique Hes, Judy Bush, 2018-02-27. Cities are striving to become more resilient, adaptive and sustainable. This requires new ways of governing and developing the city. This book features chapters by researchers using regenerative development and transitions theories to envisage how Eco Cities could be planned, designed and created and concludes with practical tools and an outline of how this evolution could be facilitated. It examines two major questions: How can we use understandings of Eco Cities to address the legacy of urban built form and existing practices which often make it difficult to create the systemic changes needed? And what are the elements of complex urban places and spaces that will enable the planning, creation and evolution of thriving cities? The book will appeal to planners, city makers, urban researchers, students and practitioners including planners, designers, architects and sustainability managers and all those seeking to envisage the steps along the path to thriving cities of the future.
