Extremal Fuzzy Dynamic Systems Gia Sirbiladze,2012-09-25 In this book the author presents a new approach to the study of weakly structurable dynamic systems It differs from other approaches by considering time as a source of fuzzy uncertainty in dynamic systems It begins with a thorough introduction where the general research domain the problems and ways of their solutions are discussed The book then progresses systematically by first covering the theoretical aspects before tackling the applications In the application section a software library is described which contains discrete EFDS identification methods elaborated during fundamental research of the book Extremal Fuzzy Dynamic Systems will be of interest to theoreticians interested in modeling fuzzy processes to researchers who use fuzzy statistics as well as practitioners from different disciplines whose research interests include abnormal extreme and monotone processes in nature and society Graduate students could also find this book useful
