

MARC controllers are designed for on-street operation and meet NEMA TS1-1989 and NEMA TS2-1992 environmental standards for actuated controllers.

The friendly, English language-based user interface allows full system access from the on-street master or from an optional central office site via Siemens ITS's MARCTM Windows-based software. The remote access allows master and local intersection programming and monitoring, providing improved programming efficiency while reducing errors.

The MARC300 series controllers are the coordinating masters in Siemens ITS's closed-loop traffic control system. As a master controller, the MARC combines system management control, monitoring, and data collection capabilities for up to thirty-two (32) intersections. One MARC controller can control and supervise the Traffic Program Selection for two (2) independent groups.

The MARC master controller, fully compatible with EAGLE local controllers, provides continuous real-time monitoring and reporting of conditions for each interconnected SE-PAC equipped controller.

As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
