Early Literacy In Preschool And Kindergarten 3rd Edition:

50 Early Childhood Literacy Strategies Janice J. Beaty, 2013 *50 Early Childhood Literacy Strategies* is the answer to the early childhood teacher's dilemma of how to teach reading to children 3, 4, and 5 years of age as mandated by the state and national governments. This book presents an easy-to-use approach involving young children's own emergence into the world of speaking and listening, reading and writing. Teachers will quickly learn what picture books and activities to use with children, how to use them, and how children can benefit from their use. They will learn what to expect as young children's writing emerges from scribbles to pictures and real words. Finally, they will come to terms with the concept of emergent literacy as it appears in preschool children and evolves into conventional literacy as it is taught in elementary school.

Lenses on Reading, Third Edition Diane H. Tracey, Lesley Mandel Morrow, 2017-05-23 Widely adopted as an ideal introduction to the major models of reading, this text guides students to understand and facilitate children's literacy development. Coverage encompasses the full range of theories that have informed reading instruction and research from classical thinking to cutting-edge cognitive, social, learning, physiological, and affective perspectives. Readers learn how theory shapes instructional decision making and how to critically evaluate the assumptions and beliefs that underlie their own teaching. Pedagogical features include framing and discussion questions, learning activities, teacher anecdotes, classroom applications, and examples of research studies grounded in each approach. New to This Edition: Chapter on physiological foundations of reading development, including the impact of nutrition, sleep, and exercise; Chapter on affective/emotional perspectives, such as the role of engagement and teacher-student relationships; Additional social learning perspectives; Critical Race Theory and Multiliteracies Theory. All chapters updated with the latest research; many new teacher anecdotes added.

The War Play Dilemma Diane E. Levin, 2006 As violence in the media and media-linked toys increases, parents and teachers are also seeing an increase in children's war play. The authors have revised this popular text to provide more practical guidance for working with children to promote creative play and for positively influencing the lessons about violence children are learning. Using a developmental and sociopolitical viewpoint, the authors examine five possible strategies for resolving the war play dilemma and show which best satisfy both points of view: banning war play, taking a laissez-faire approach, allowing war play with specified limits, actively facilitating war play, and limiting war play while providing alternative ways to work on the issues. New for the Second Edition are more anecdotal material about adults and children's experiences with war play, including examples from both home and school settings; greater emphasis on the impact of media and commercialization on children's war play, including recent trends in media programming, marketing, and war toys; expanded discussion about the importance of the distinction between imitative and creative war play; and summary boxes of key points directed at teachers or parents. New information about violent video games, media cross-feeding, and gender development and sex role stereotyping.
