Day, Michael Elliott, Ramachandran Ramesh, 2019-01-24 Coasts and Estuaries The Future provides valuable information on how we can protect and maintain natural ecological structures while also allowing estuaries to deliver services that produce societal goods and benefits These issues are addressed through chapters detailing case studies from estuaries and coastal waters worldwide presenting a full range of natural variability and human pressures Following this a series of chapters written by scientific leaders worldwide synthesizes the problems and offers solutions for specific issues graded within the framework of the socio economic environmental mosaic These include fisheries climate change coastal
