Foliations 2005 - Proceedings Of The International Conference Pawel Walczak, Remi Langevin, Takashi Tsuboi, Steven Hurder, 2006-09-20 This volume takes a look at the current state of the theory of foliations with surveys and research articles concerning different aspects The focused aspects cover geometry of foliated Riemannian manifolds Riemannian foliations and dynamical properties of foliations and some aspects of classical dynamics related to the field Among the articles readers may find a study of foliations which admit a transverse contractive flow an extensive survey on non commutative geometry of Riemannian foliations an article on contact structures converging to foliations as well as a few articles on conformal geometry of foliations This volume also contains a list of open problems in foliation theory which were collected from the participants of the Foliations 2005 conference

Foliations, Geometry, and Topology Nicolau Corção Saldanha, 2009 This volume represents the proceedings of the conference on Foliations Geometry and Topology held August 6 10 2007 in Rio de Janeiro Brazil in honor of the 70th birthday of Paul Schweitzer The papers concentrate on the theory of foliations and related areas such as dynamical systems group actions on low dimensional manifolds and geometry of hypersurfaces There are survey papers on classification of foliations and their dynamical properties including codimension one foliations with Bott Morse singularities Other papers involve the relationship of foliations with characteristic classes contact structures and Eliashberg Mishachev wrinkled mappings

Foliations 2005 Paweł Grzegorz Walczak, 2006 This volume takes a look at the current state of the theory of foliations with surveys and research articles concerning different aspects The focused aspects cover geometry of foliated Riemannian manifolds Riemannian foliations and dynamical properties of foliations and some aspects of classical dynamics related to the field Among the articles readers may find a study of foliations which admit a transverse contractive flow an extensive survey on non commutative geometry of Riemannian foliations an article on contact structures converging to foliations as well as a few articles on conformal geometry of foliations This volume also contains a list of open problems in foliation theory which were collected from the participants of the Foliations 2005 conference

The Novikov Conjecture Matthias Kreck, Wolfgang Lück, 2004-11-22 These lecture notes contain a guided tour to the Novikov Conjecture and related conjectures due to Baum Connes Borel and Farrell Jones They begin with basics about higher signatures Whitehead torsion and the s Cobordism Theorem Then an introduction to surgery theory and a version of the assembly map is presented Using the solution of the Novikov conjecture for special groups some applications to the classification of low dimensional manifolds are given

Projective Geometry and Formal Geometry Lucian Badescu, 2012-12-06 The aim of this monograph is to introduce the reader to modern methods of projective geometry involving certain techniques of formal geometry Some of these methods are illustrated in the first part through the proofs of a number of results of a rather classical flavor involving in a crucial way the first infinitesimal neighbourhood of a given subvariety in an ambient variety Motivated by the first part in the second formal functions on the formal completion X_Y of X

along a closed subvariety Y are studied particularly the extension problem of formal functions to rational functions The formal scheme X/Y introduced to algebraic geometry by Zariski and Grothendieck in the 1950s is an analogue of the concept of a tubular neighbourhood of a submanifold of a complex manifold It is very well suited to study the given embedding Y subset X The deep relationship of formal geometry with the most important connectivity theorems in algebraic geometry or with complex geometry is also studied Some of the formal methods are illustrated and applied to homogeneous spaces The book contains a lot of results obtained over the last thirty years many of which never appeared in a monograph or textbook It addresses to algebraic geometers as well as to those interested in using methods of algebraic geometry

Dynamics of Foliations, Groups and Pseudogroups Paweł Walczak, 2004-04-23 This book deals with the dynamics of general systems such as foliations groups and pseudogroups systems which are closely related via the notion of holonomy It concentrates on notions and results related to different ways of measuring complexity of systems under consideration More precisely it deals with different types of growth entropies and dimensions of limiting objects Problems related to the topics covered are provided throughout the book
